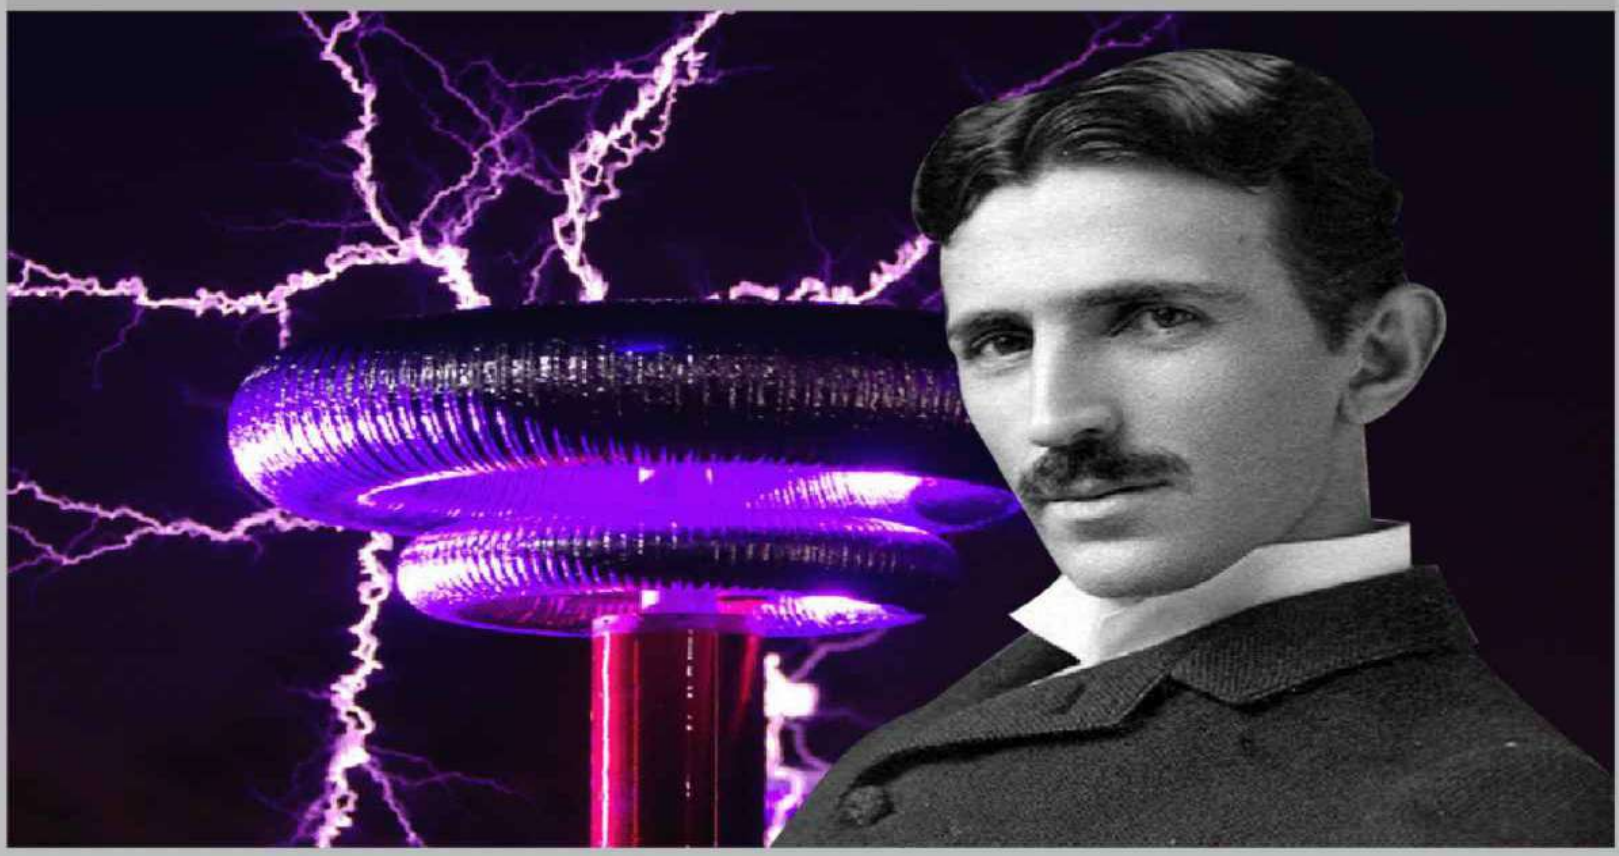
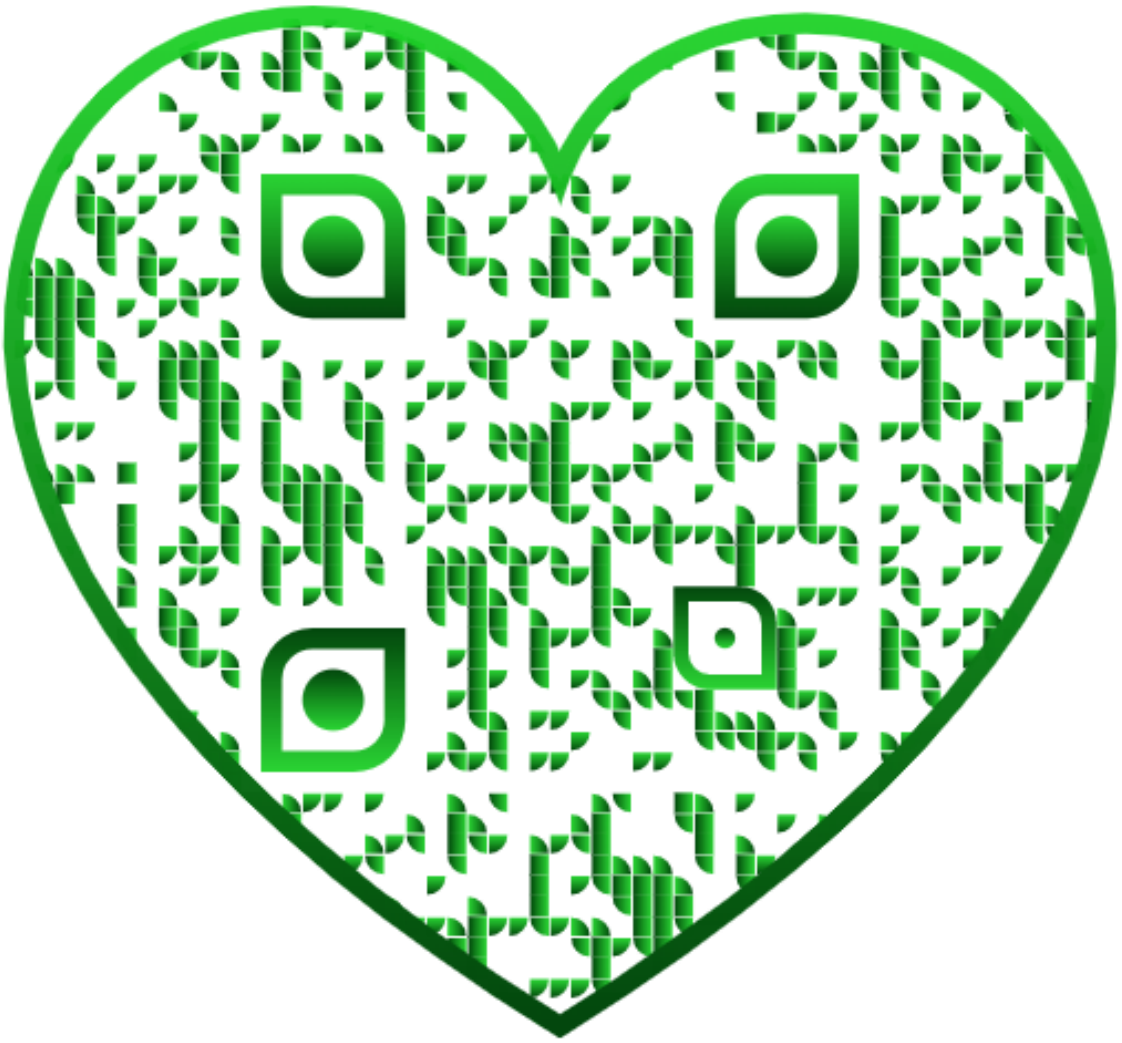
# Nikola Tesla and The "369 Code"

## Decoding God's Thumbprint

LEONARDO BARRIOS BERETTA

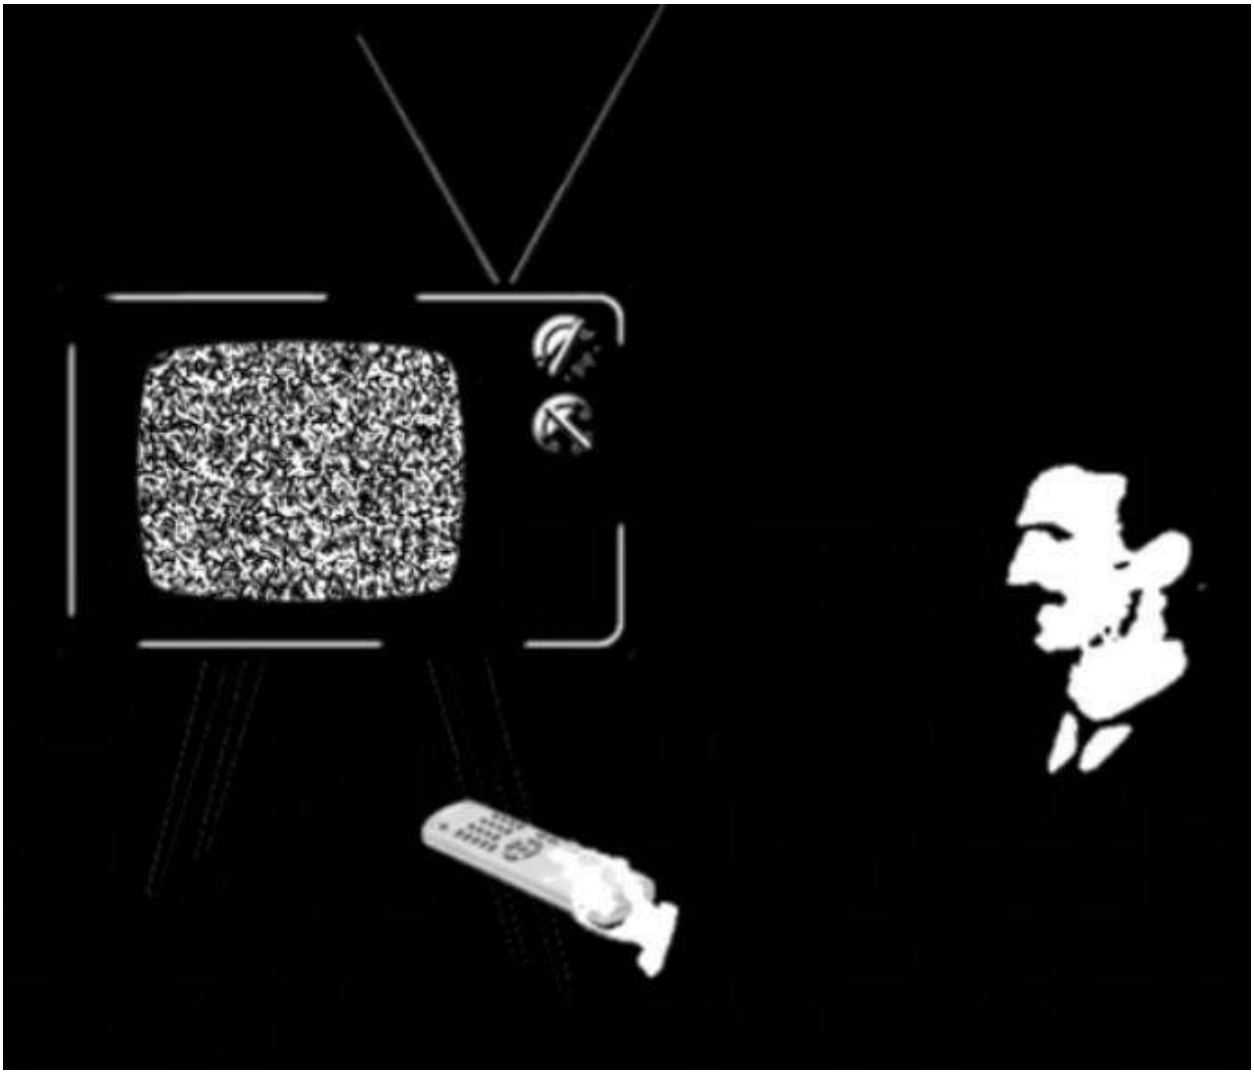




# Nikola Tesla and The ¨369 Code¨.

## Decoding God's Thumbprint

Nikola Tesla did countless mysterious experiments, but he was a whole other mystery on his own.



Almost all genius Minds have a certain obsession, Nikola Tesla had a pretty big one.

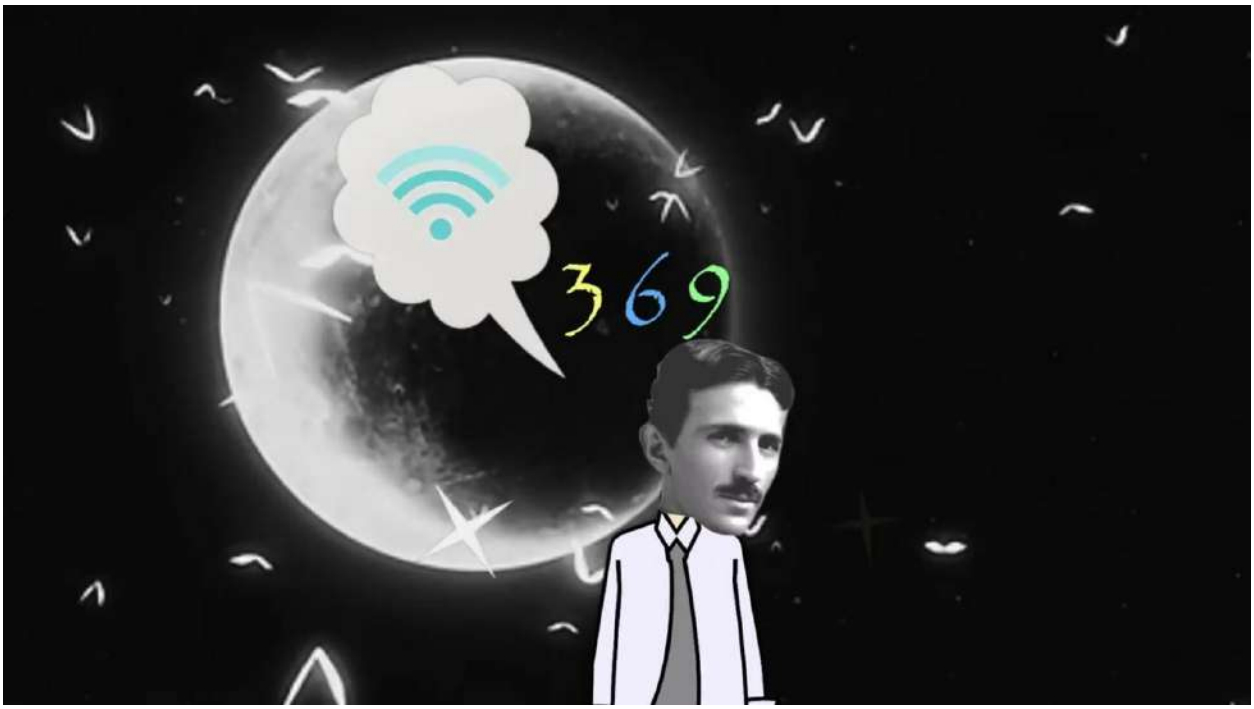
Tesla had some interesting habits that he would do, for example he would walk on the block repeatedly three times before entering a building.

He would clean his plates with 18 napkins.

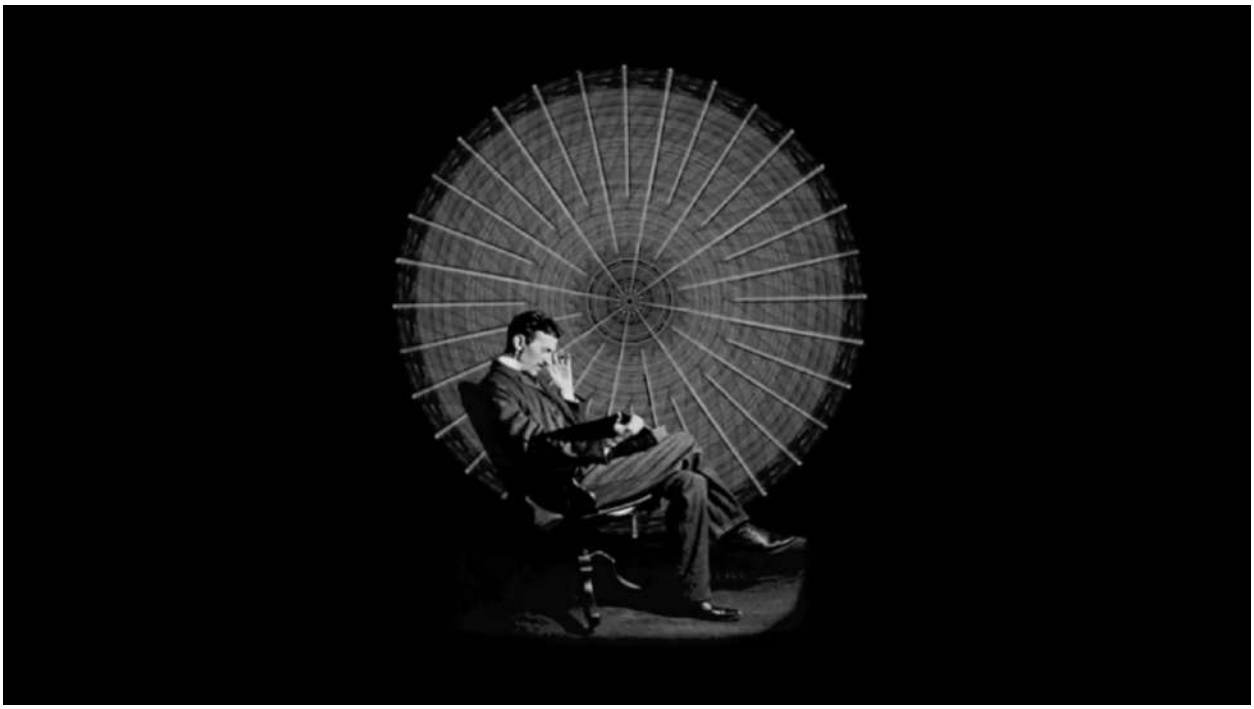
He lived in hotel rooms only with the number 8 divisible by three.

3327
The Nikola Tesla Room
The great inventor Nikola Tesla occupied this room from 1933 to 1943.
He invented the system of AC electrical power that is used throughout the world today.
including the generator, motor and method of transmission.
He also holds the patent for wireless communication.
Perhaps his most famous project is the electrical powerplant at Niagara Falls, NY.

He would make calculations about things and his immediate environment to make sure the result is divisible by three.

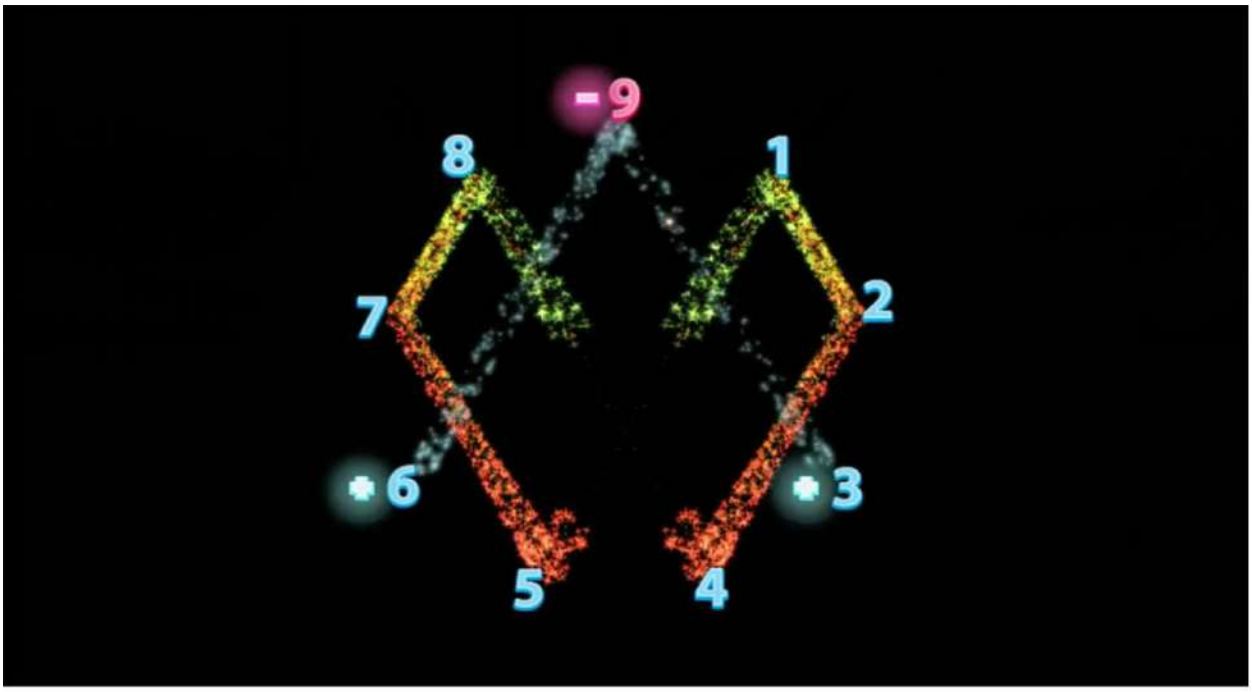


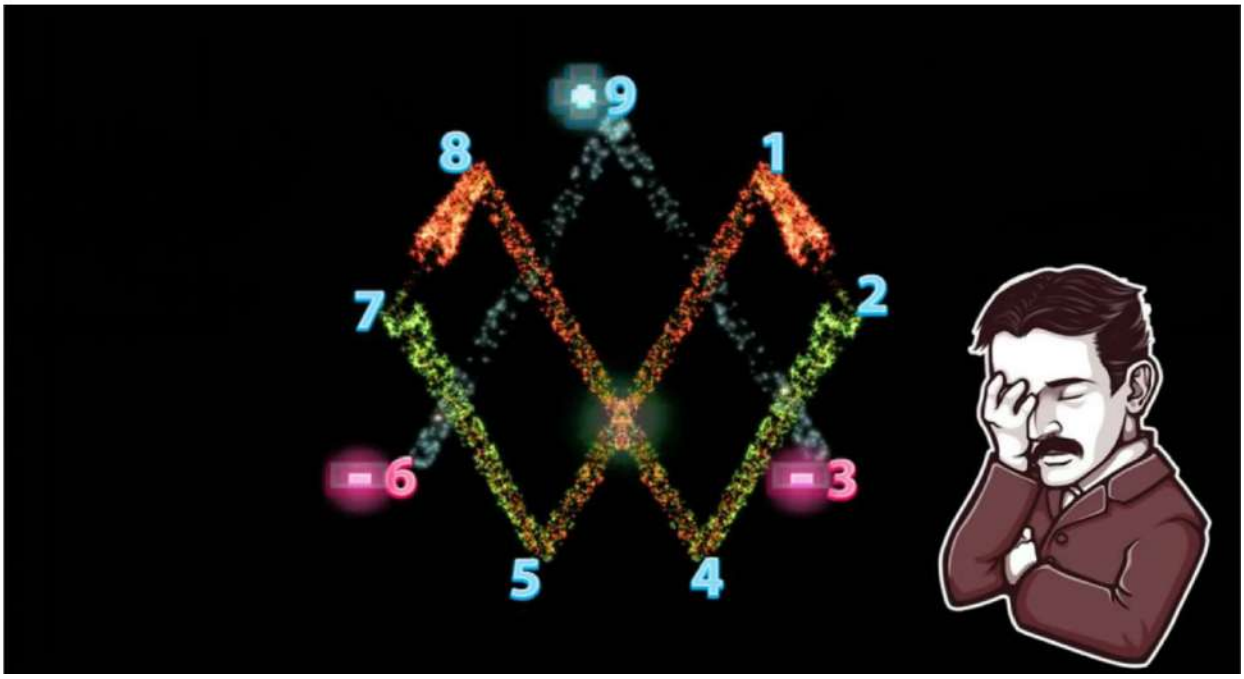
He would do everything in sets of 3, some say he had OCD and others say he was very superstitious, however the truth is a lot deeper.



His obsession was not simply with numbers, but especially these numbers 3, 6 and 9.

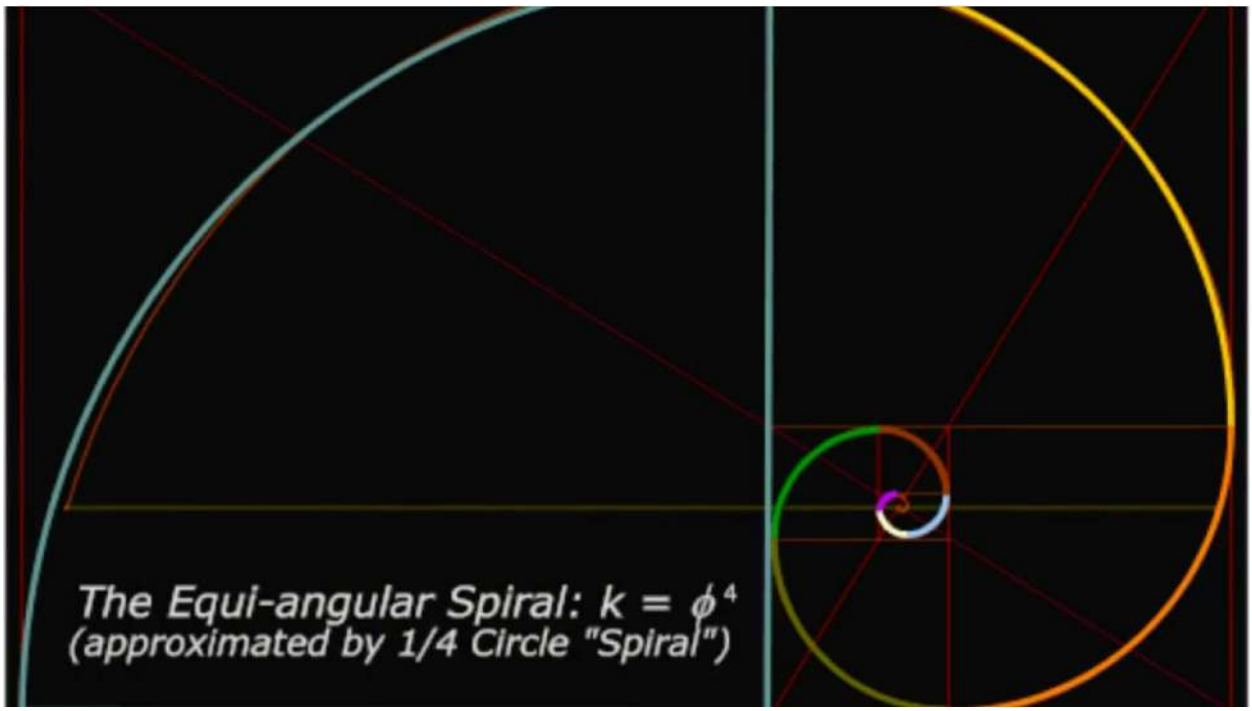
Tesla claimed that these numbers were extremely important and nobody listened, ¿But why these numbers? ¿What did Nikola Tesla tried to make the world understand?



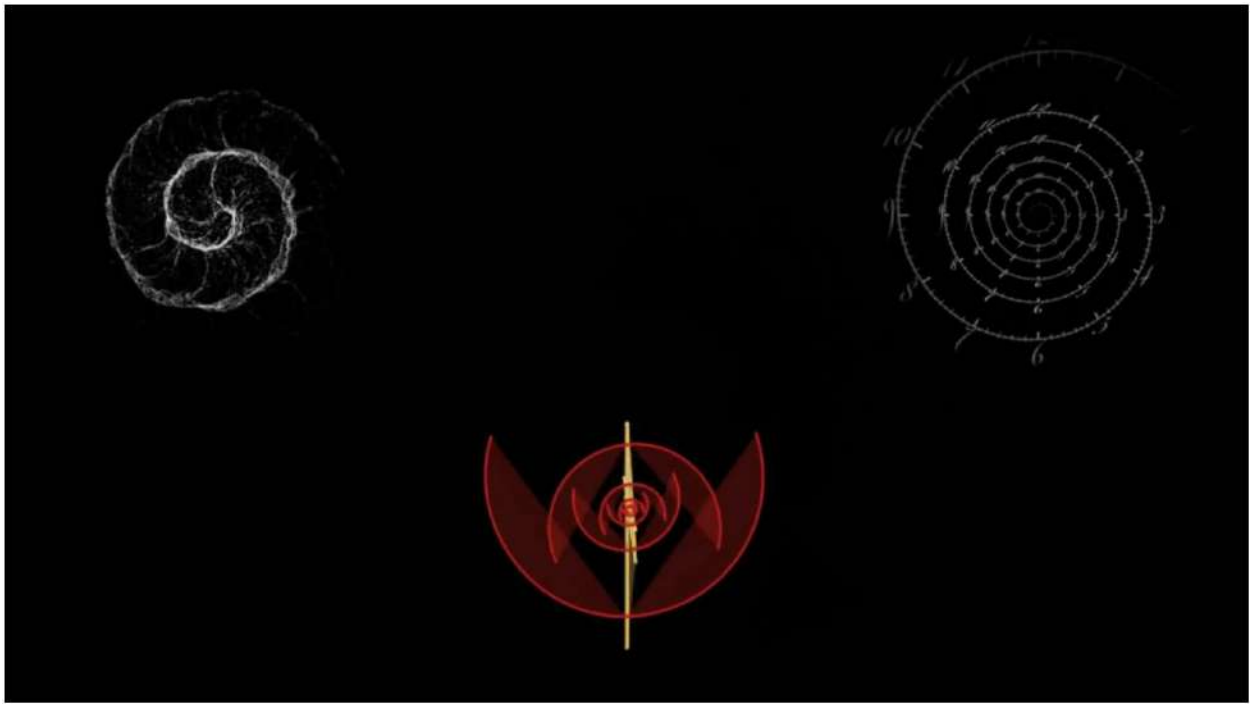


First we must understand that we did not create math, we discovered it.

It's the universal language in law, no matter where you were in the universe 1 plus 2 were always equal to 3.



Everything in the universe will be his law, there are patterns that naturally occur in the universe.



Patterns that we discovered in life, galaxies, star formations, evolution and almost all natural systems, some of these patterns are the golden ratio and sacred geometry, one really important system that nature seems to obey is the power up to binary system.

In which the patterns start from one and continues doubling the numbers.

## The Binary Number System

- ❑ The prefix "**bi-**" stands for 2.
- ❑ The binary number system is a **Base 2** number system:
- ✓ There are **2 symbols** that represent quantities:

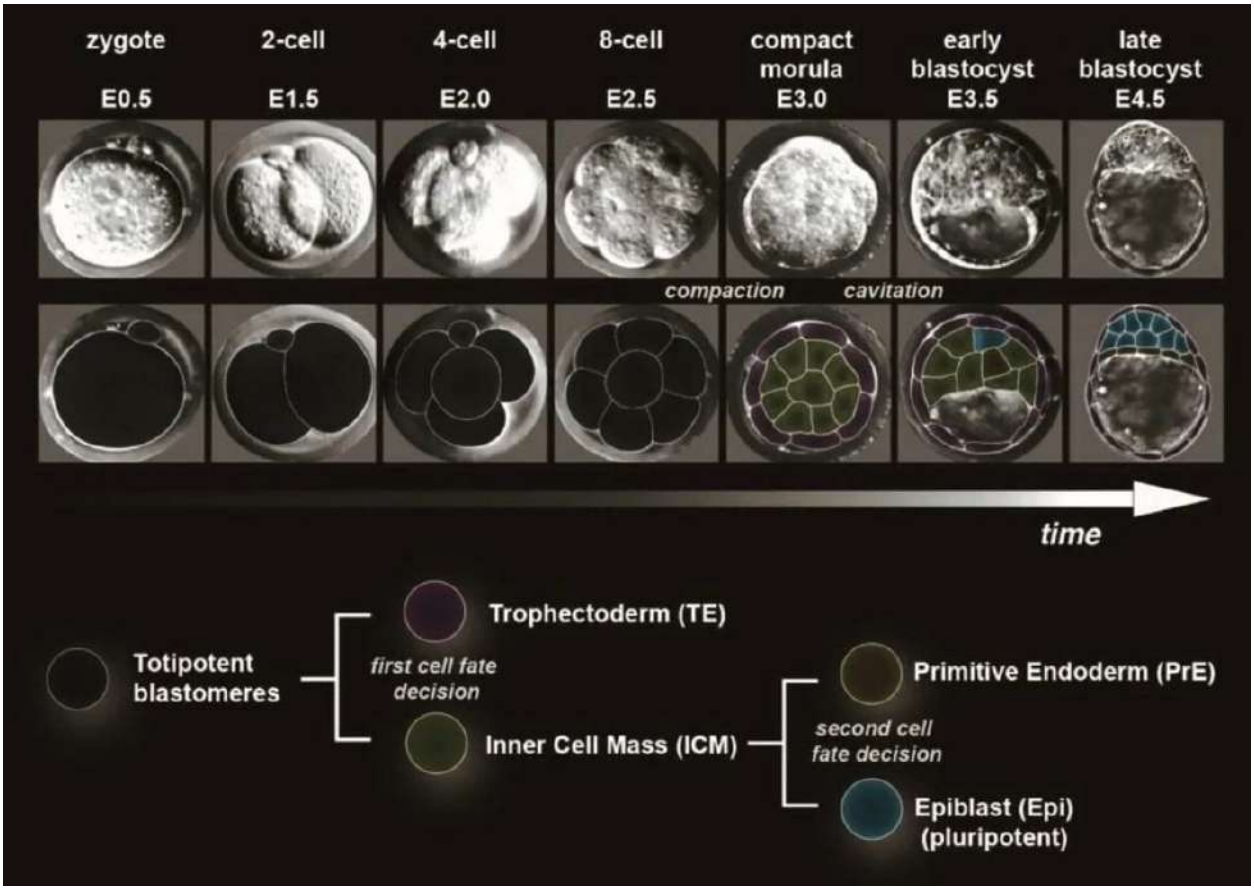
**0, 1**

- ✓ **Each place value in a binary number is a power of 2.**

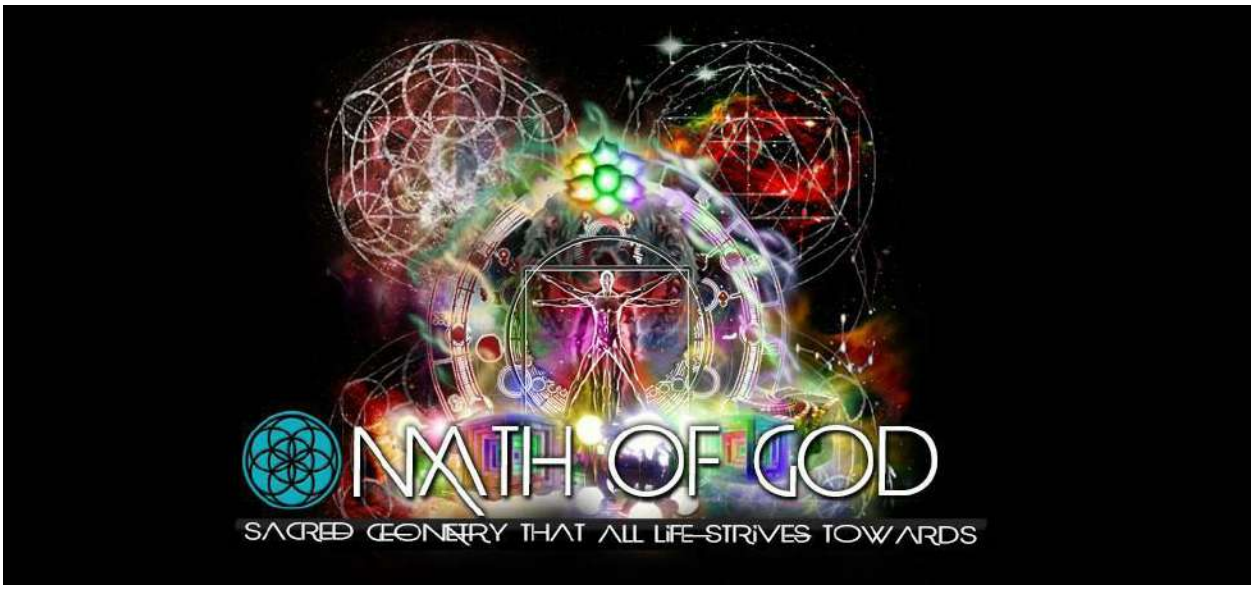
From right to left, the successive positions of the binary number are weighted **1, 2, 4, 8, 16, 32, 64**, etc. A list of the first several powers of 2 follows:

| $2^0$ | $2^1$ | $2^2$ | $2^3$ | $2^4$ | $2^5$ | $2^6$ | $2^7$ | $2^8$ | $2^9$ | $2^{10}$ | $2^{11}$ |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | 2 | 4 | 8 | 16 | 32 | 64 | 128 | 256 | 512 | 1024 | 2048 |

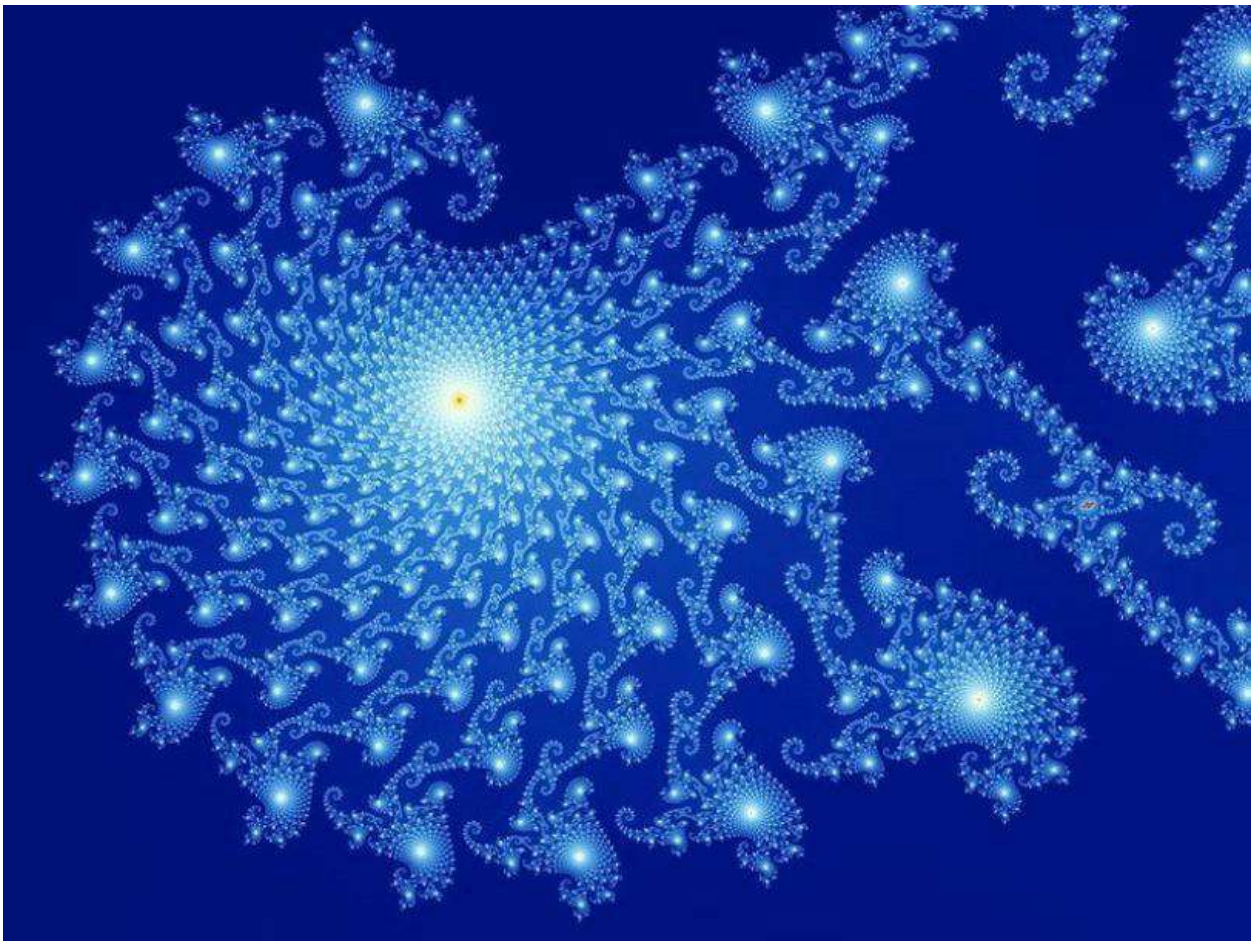
Cells and embryos develop following this sacred pattern 1, 2, 4, 8, 16, 32, etcetera.



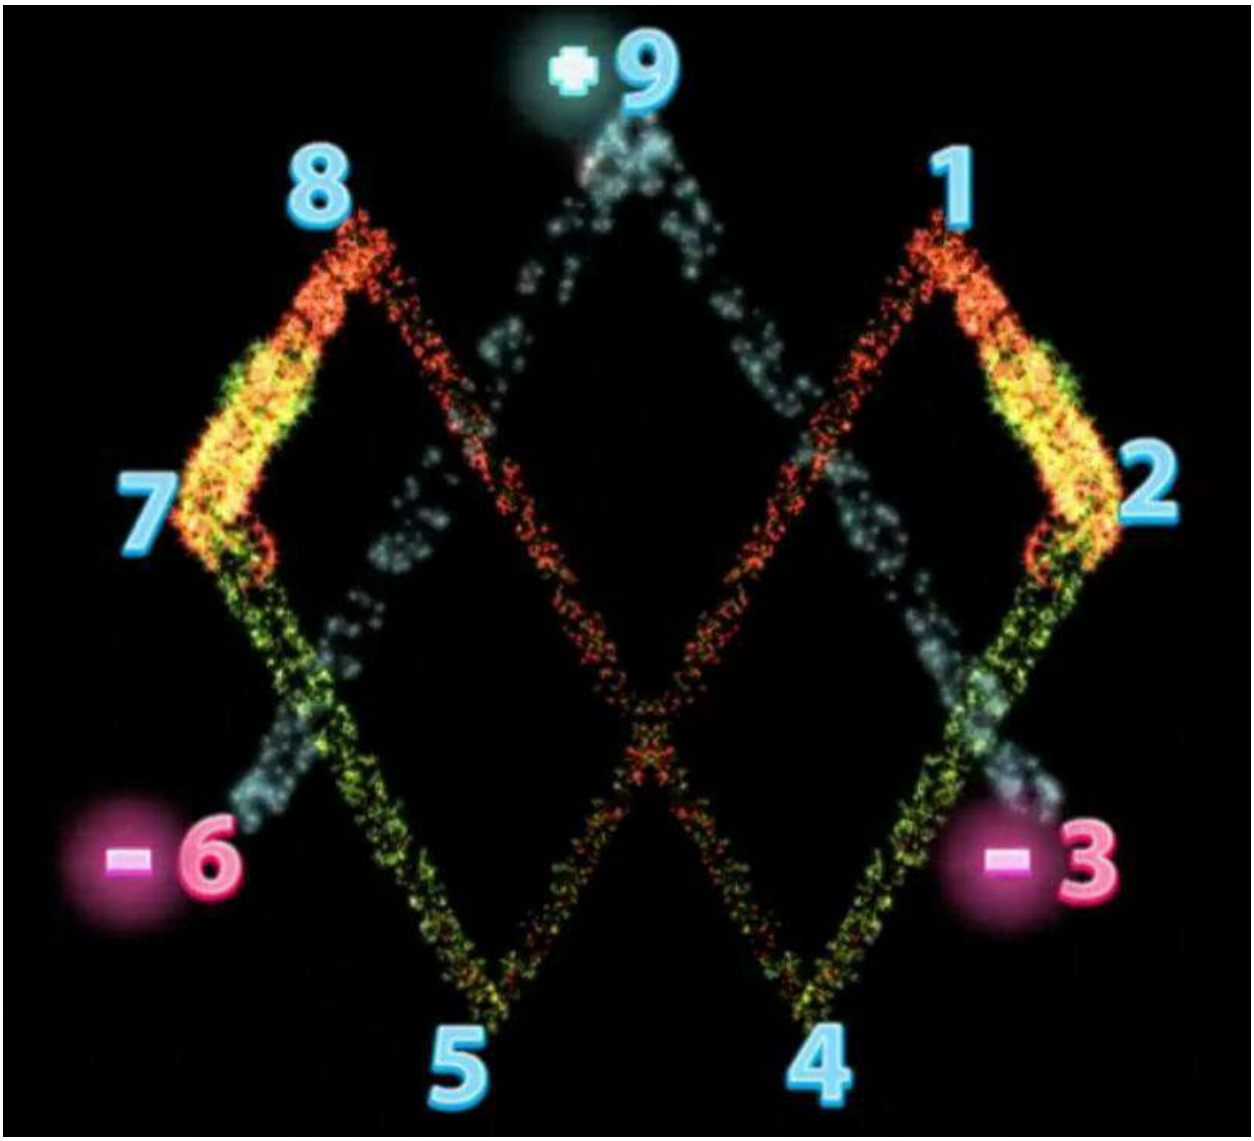
Some Colley's patterns is the blueprint of God math.



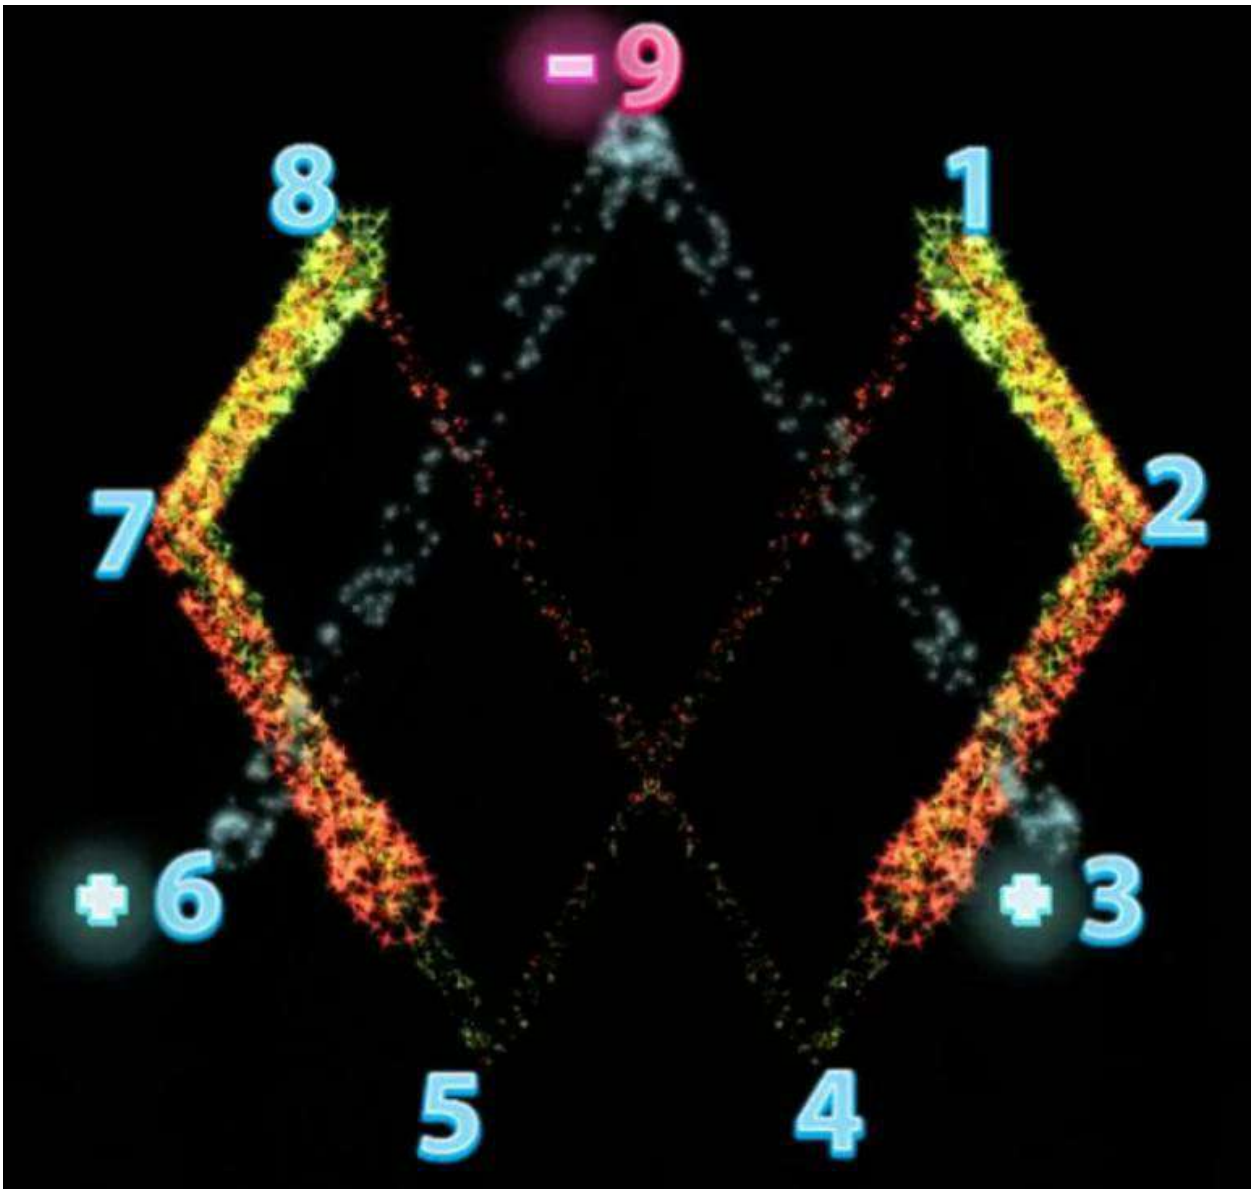
By this analogy would be God's thumbprint leaving all religion aside in to a vortex math.



The science of Taurus Anatomy, there is a pattern that repeats itself, 1, 2, 4, 8, 7 and 5.



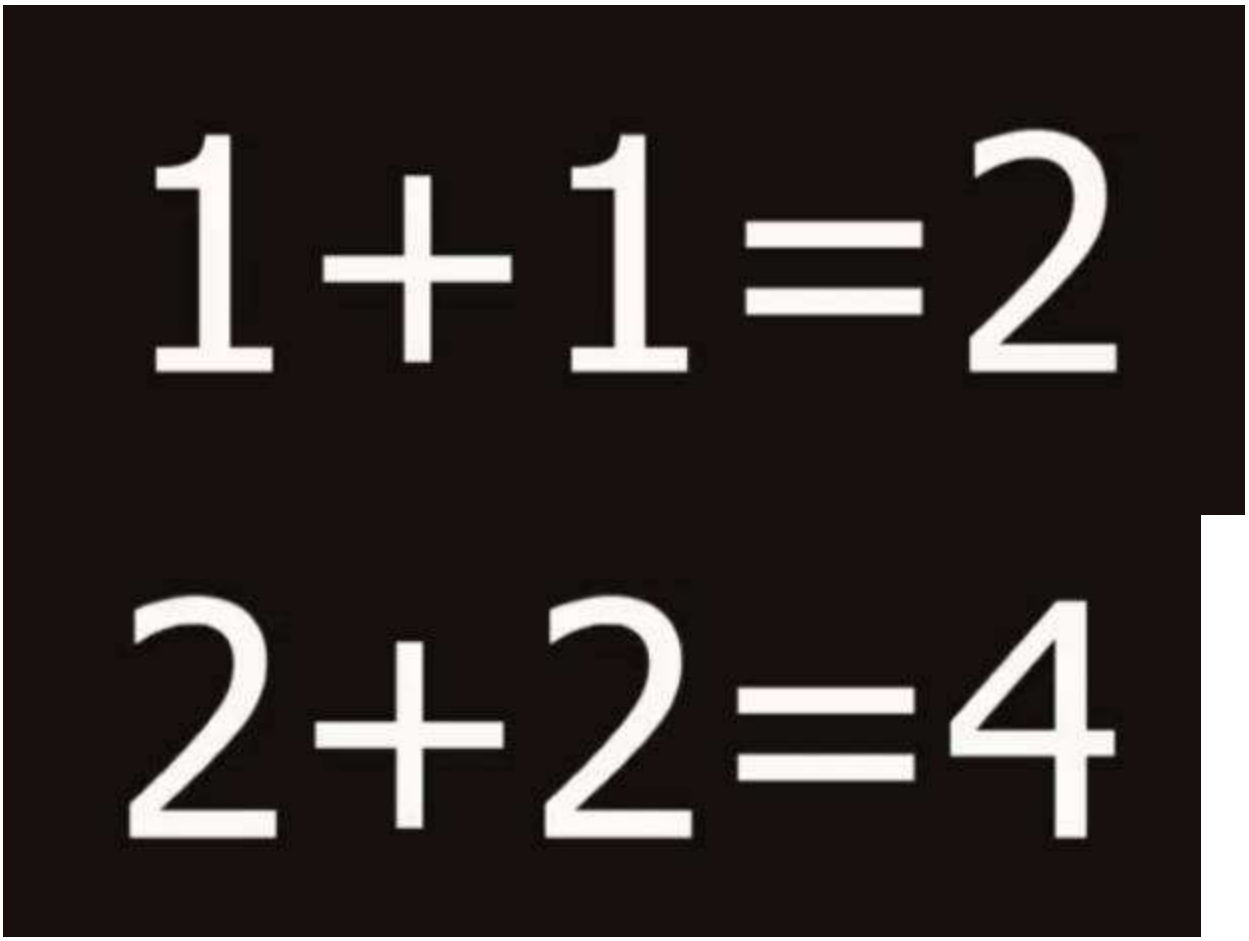
And so on as you can see 3, 6 and 9 are not in this pattern.



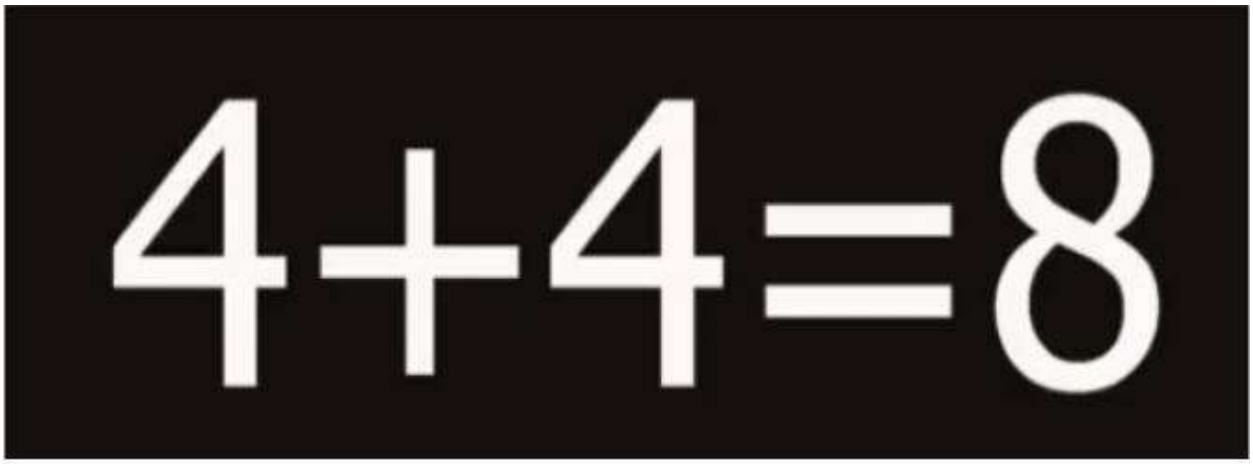
Scientist Marco Rawdon believes these numbers represent a vector from the third and fourth dimension.

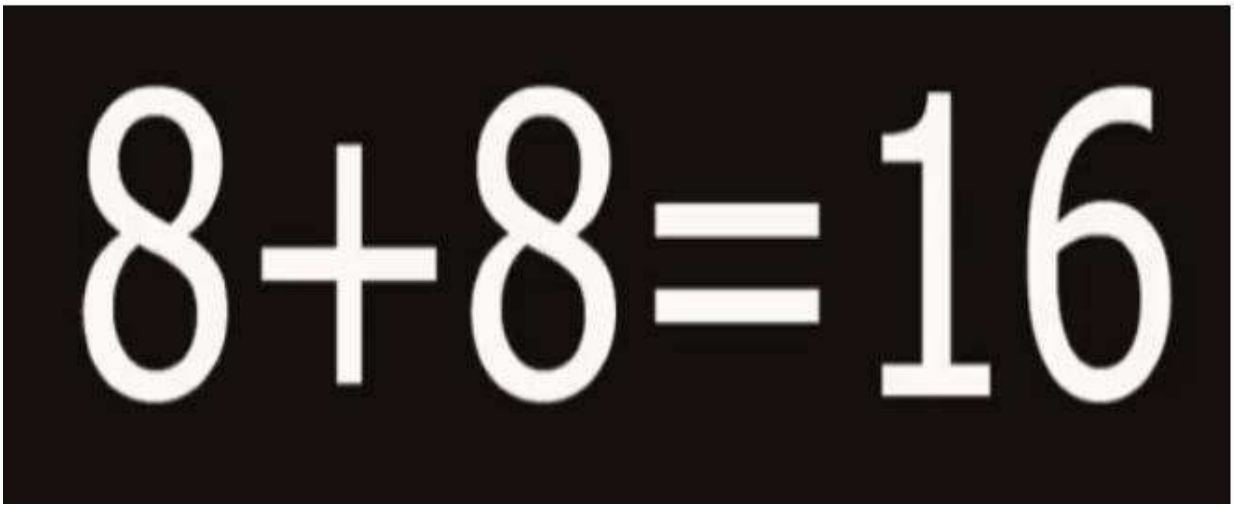
Which he calls a flux field, this field is supposed to be a higher dimensional energy that influences the energy circuit of the other six points.

Randy Powell, a student of Marco Rawdon, says that this is the secret key to free energy, something we all know Tesla mastered. Let me explain, let's start from one.



1+1=2
2+2=4

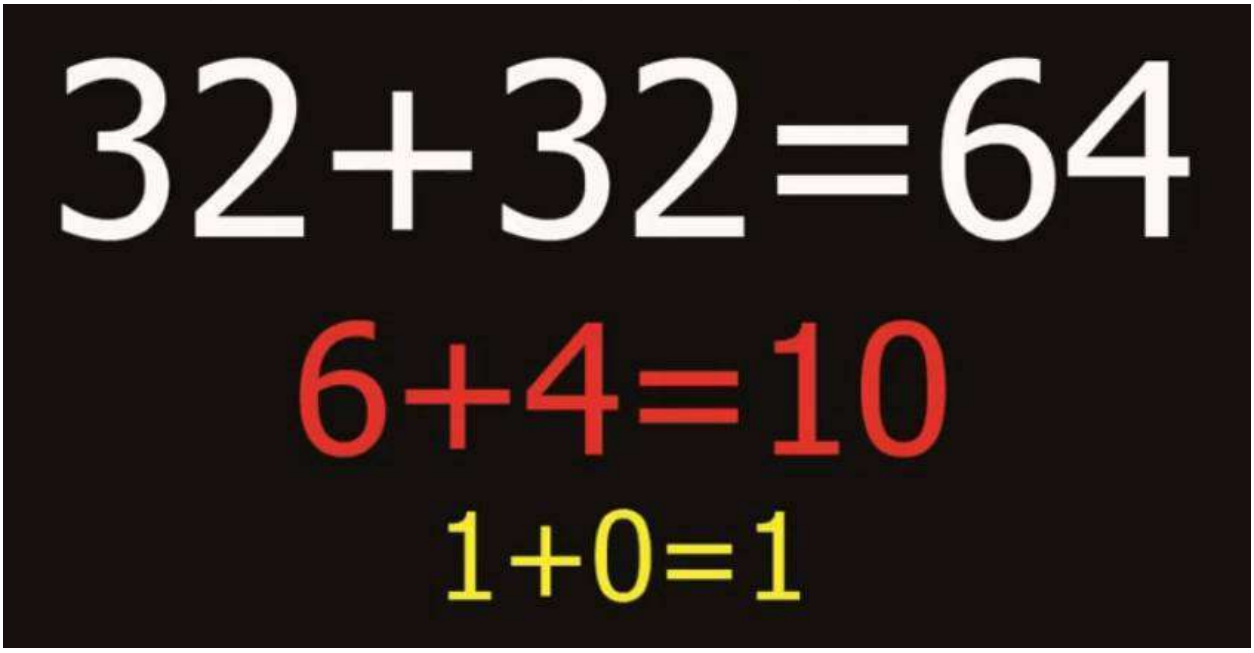




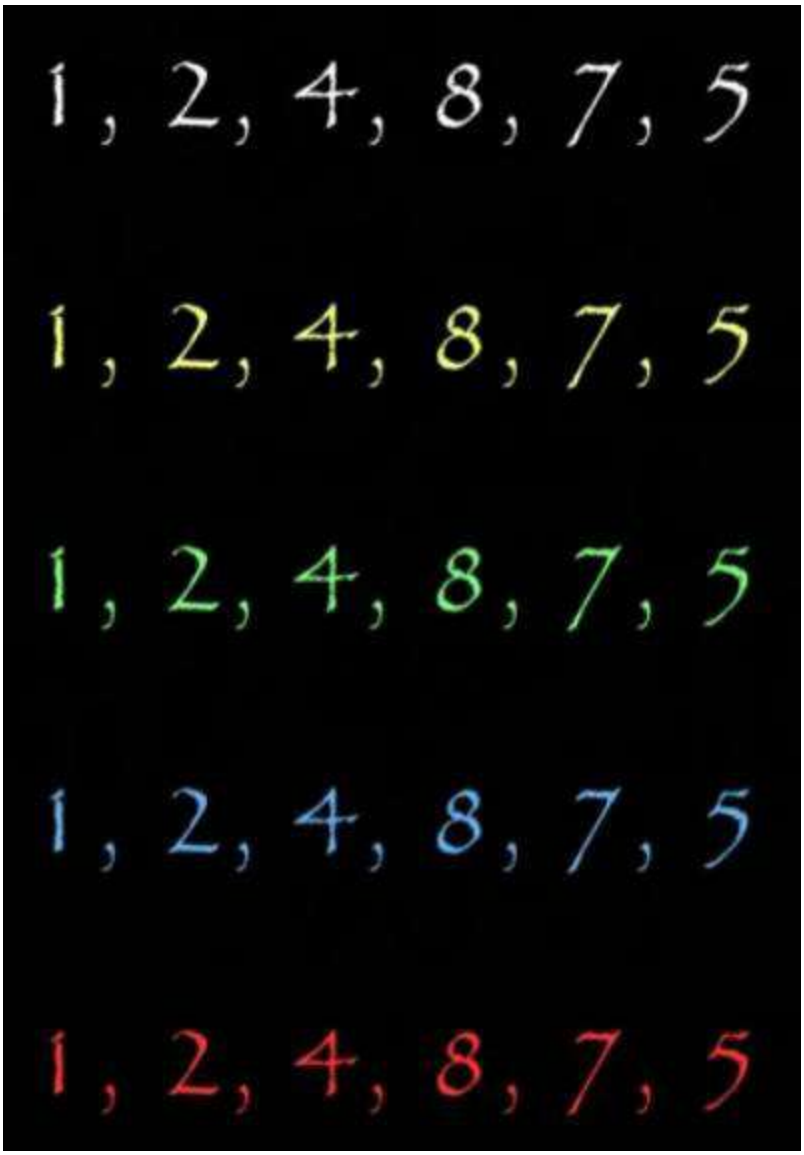
**Which means that;**

## Resulting that;

You can do 7 doubled if you want to, which you would get 14.



So if we continue, we will keep following the same pattern.



As you can see there is no mention of 3, 6, and 9, it's like they are beyond this pattern free from it.

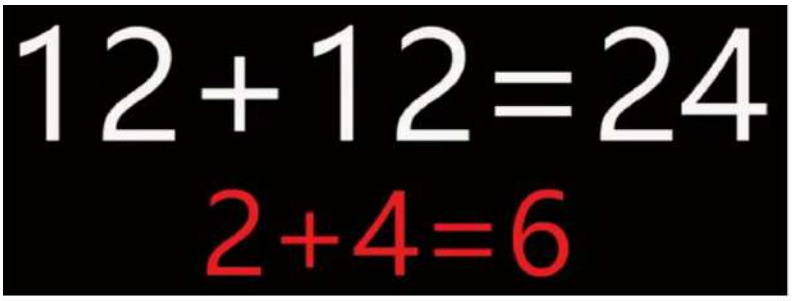
However, there is something strange once you start doubling them.

3+3=6

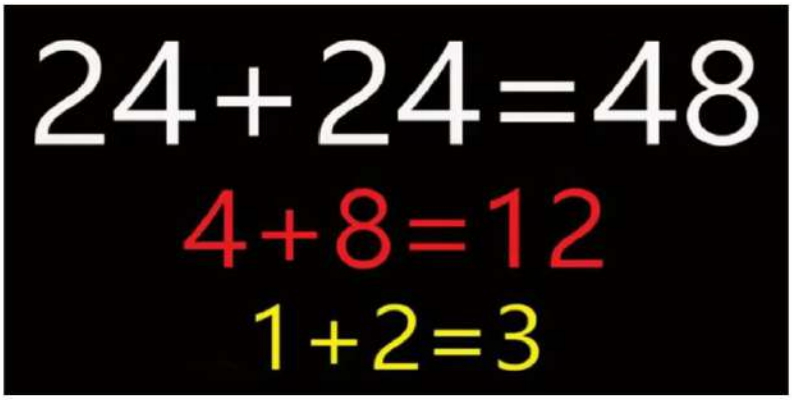
6+6=12

**Which would result in;**

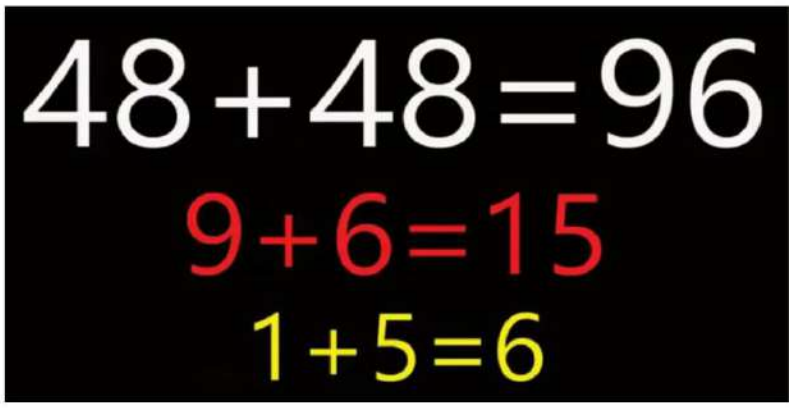
1+2=3 In this pattern there is no mention of ¨ **9** ¨**,** It's like ¨ **9** ¨ is beyond completely free from both patterns.



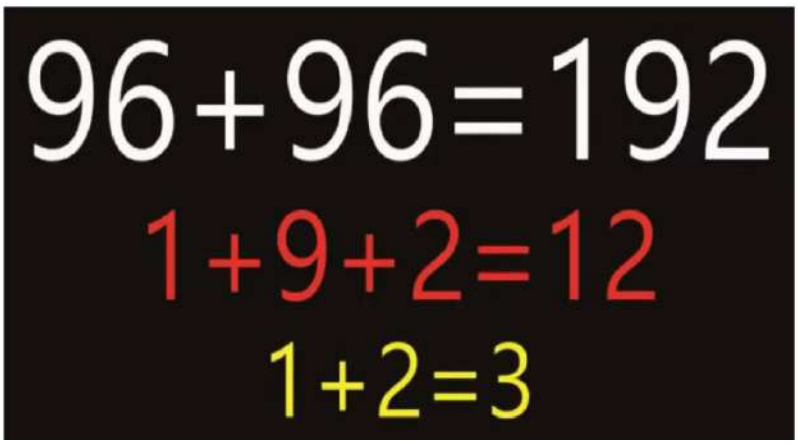
12+12=24
2+4=6



24+24=48
4+8=12
1+2=3



48+48=96
9+6=15
1+5=6



96+96=192
1+9+2=12
1+2=3

192+192=384

3+8+4=15

1+5=6

384+384=768

7+6+8=21

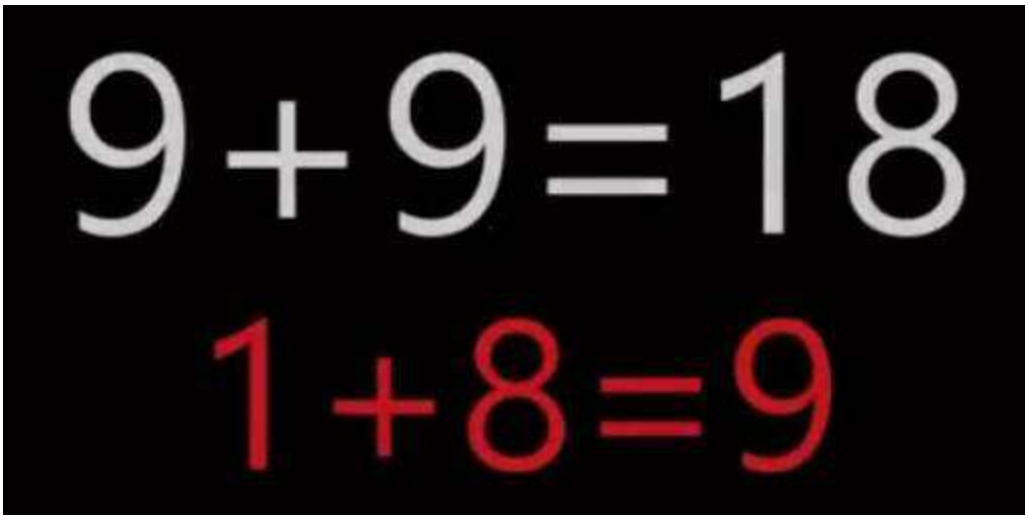
2+1=3

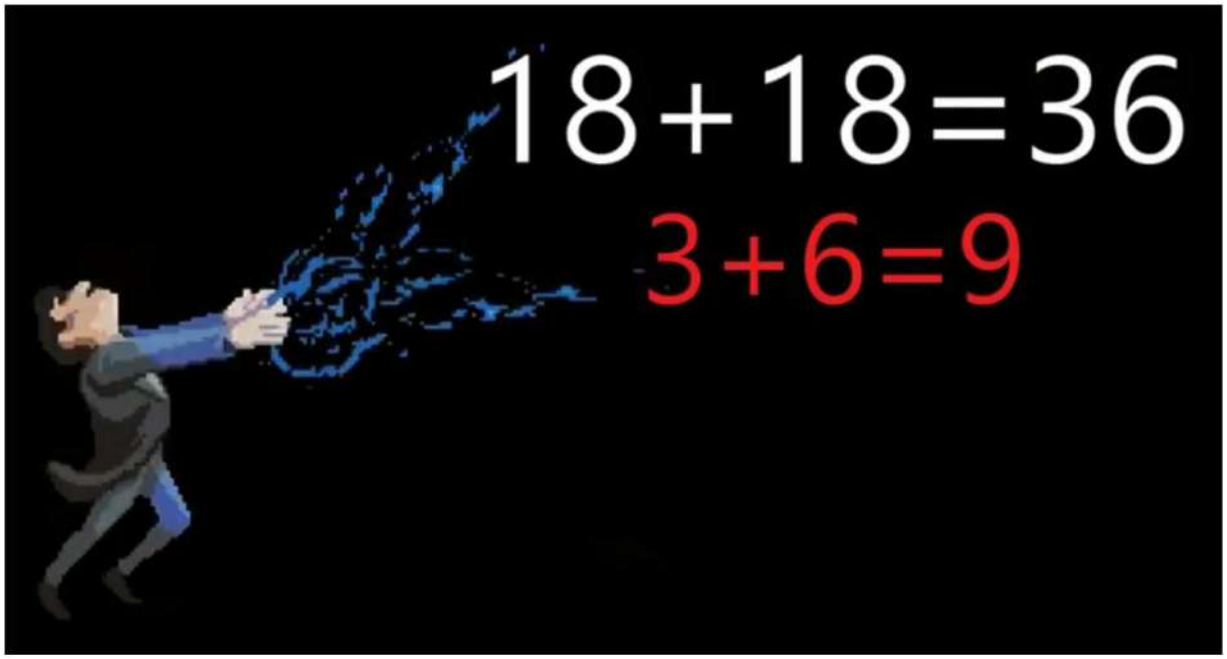
768+768=1536

1+5+3+6=15

1+5=6

**But if you start a ¨ 9 ¨, it will always result in ¨ 9 ¨ .**

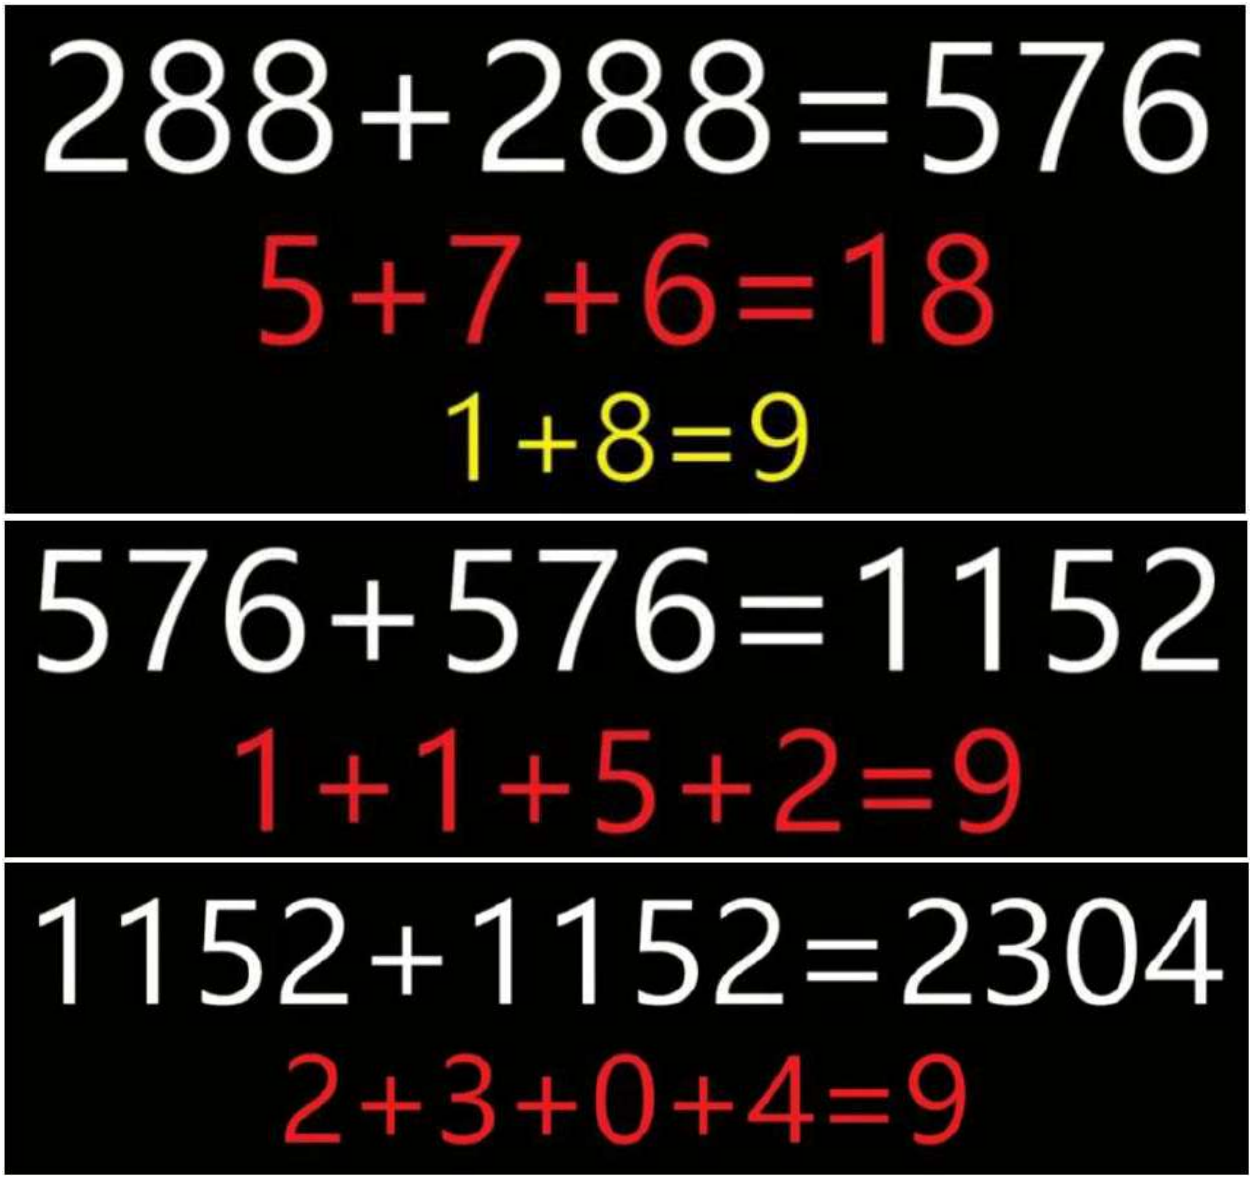




36+36=72
7+2=9

72+72=144
1+4+4=9

144+144=288
2+8+8=18
1+8=9



This is called the symbol of enlightenment.

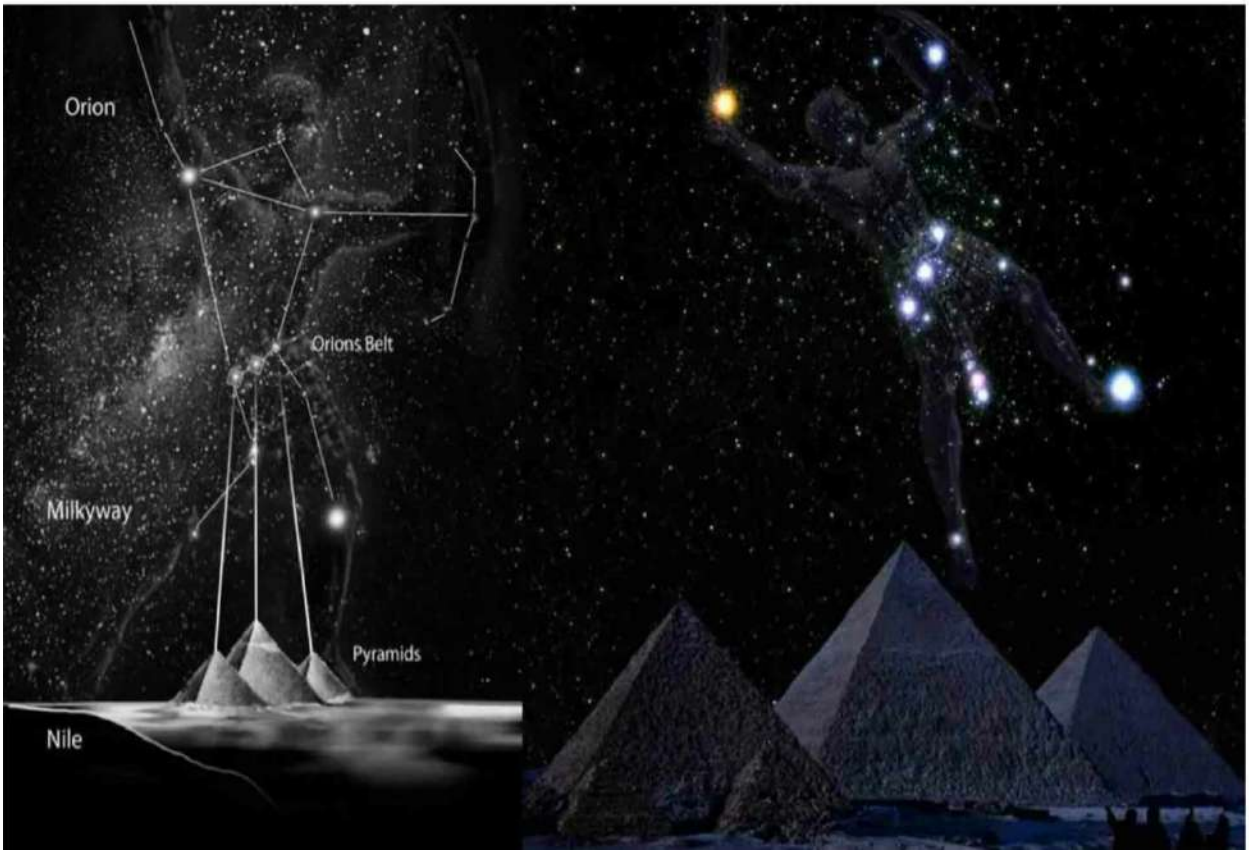
If we go to the Great Pyramid of Giza, not only are there three larger Pyramids all side by side.

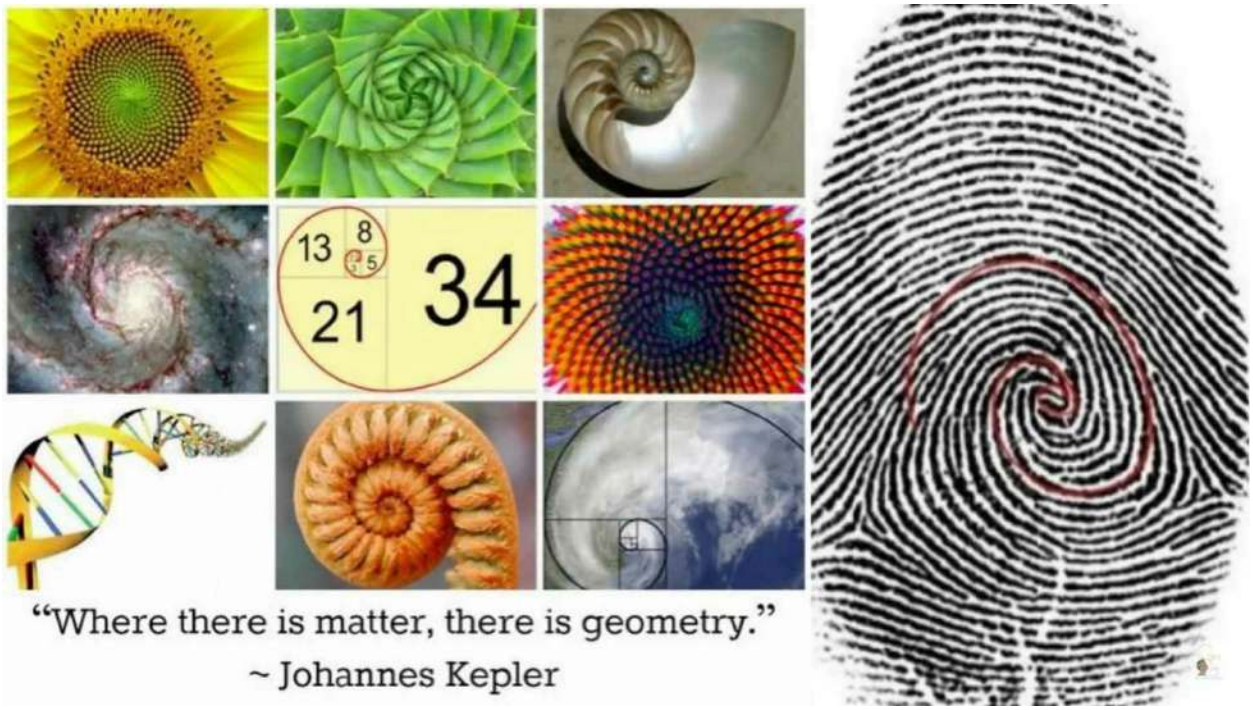
Mirroring the positions of the stars in Orion's belt.



Orion
Orions Belt
Milkyway
Pyramids
Nile

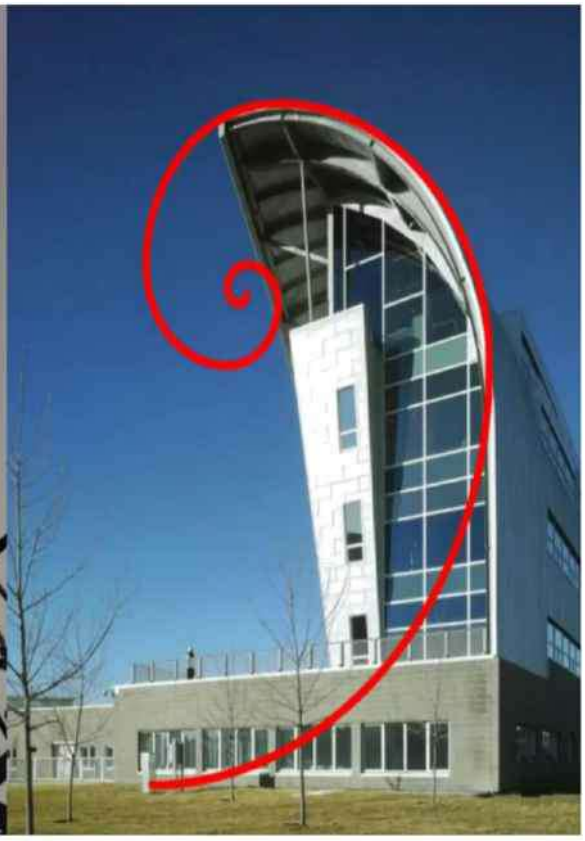
But we also see a group of three smaller pyramids immediately away from the three larger pyramids.

We find lots of evidence, that nature uses three-fold and six-fold symmetry.



These shapes are in nature.

And the ancients emulated these shapes in the buildings of their sacred architecture.



¿Is it possible that Tesla uncovered this profound secret and uses knowledge to push the boundaries of Science and Technology?

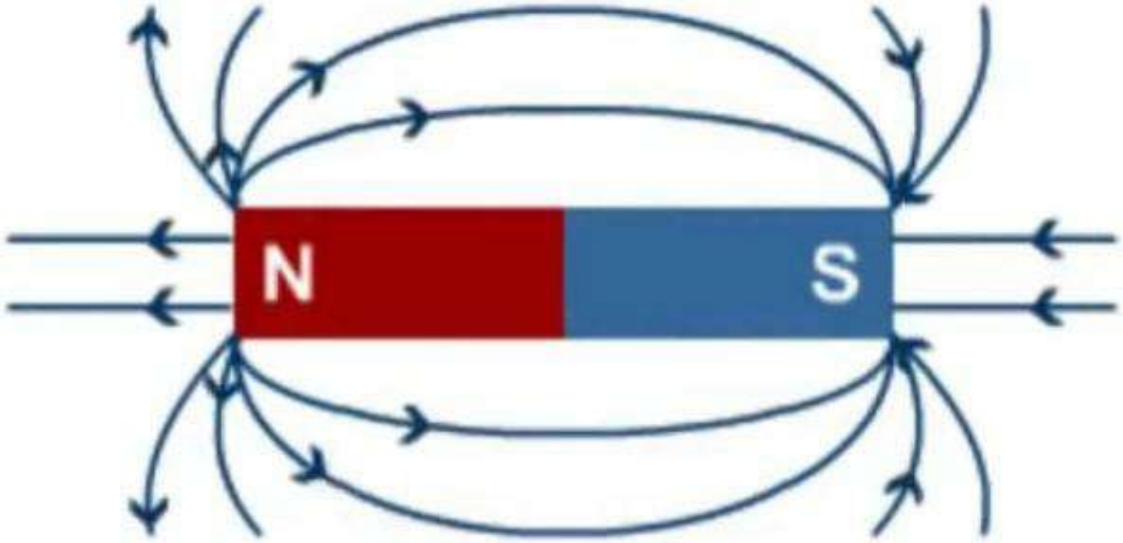
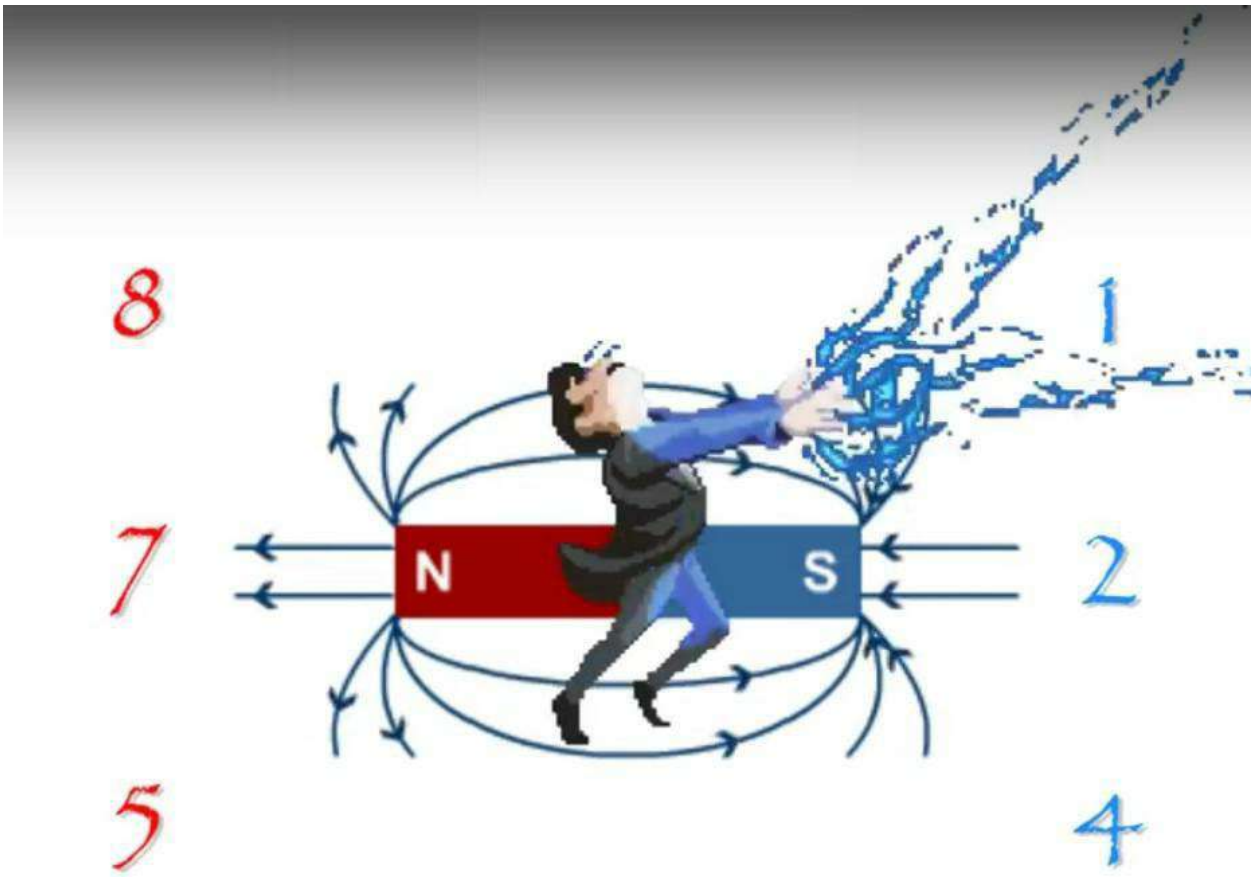
# The Magnificence of 9

Let's say there are two opposites, you can call them white and black if you want.

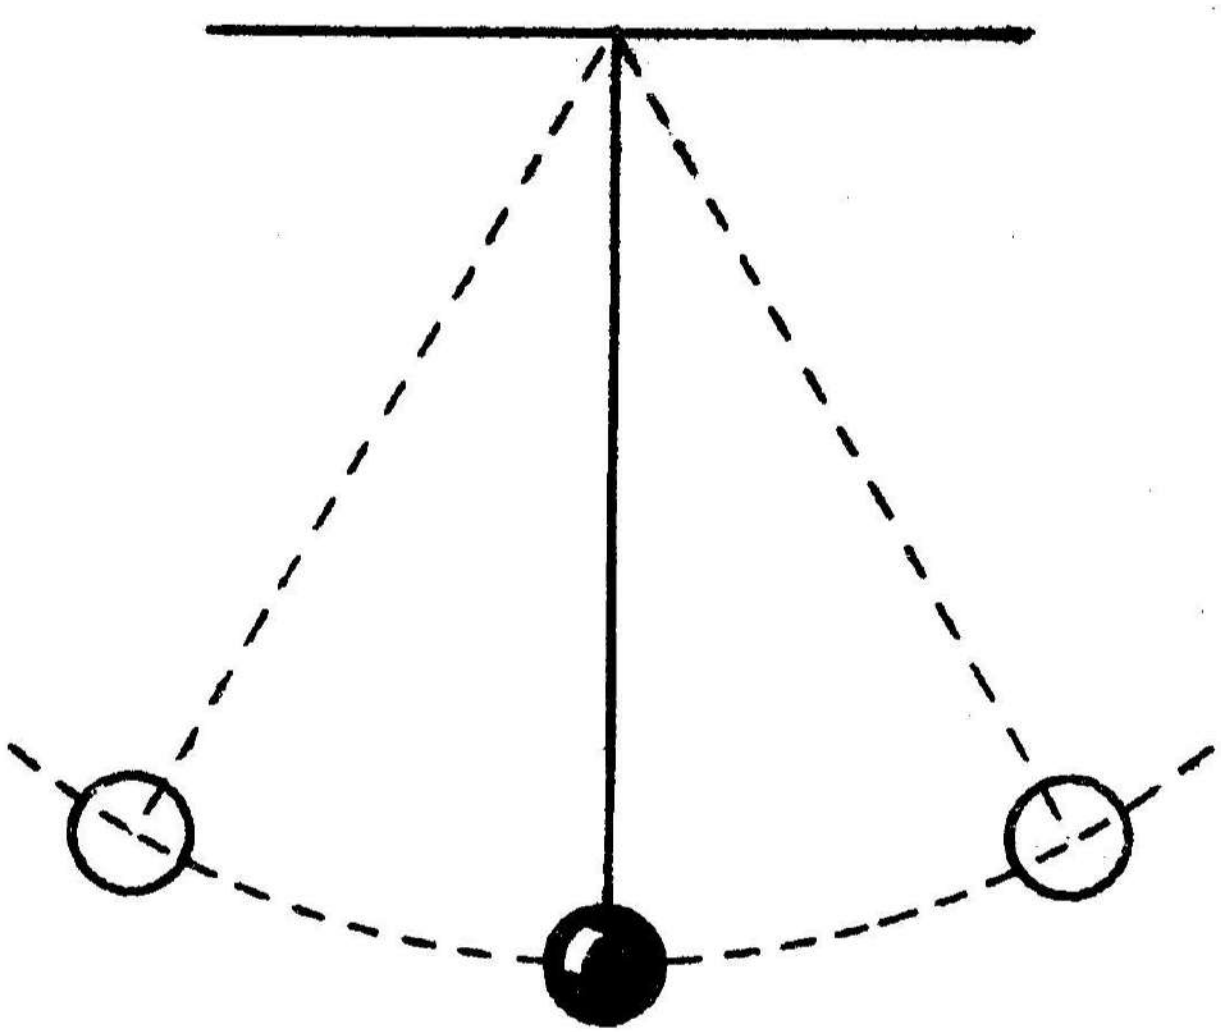
They are like the north and south poles of a magnet, one side is 1, 2 and 4.



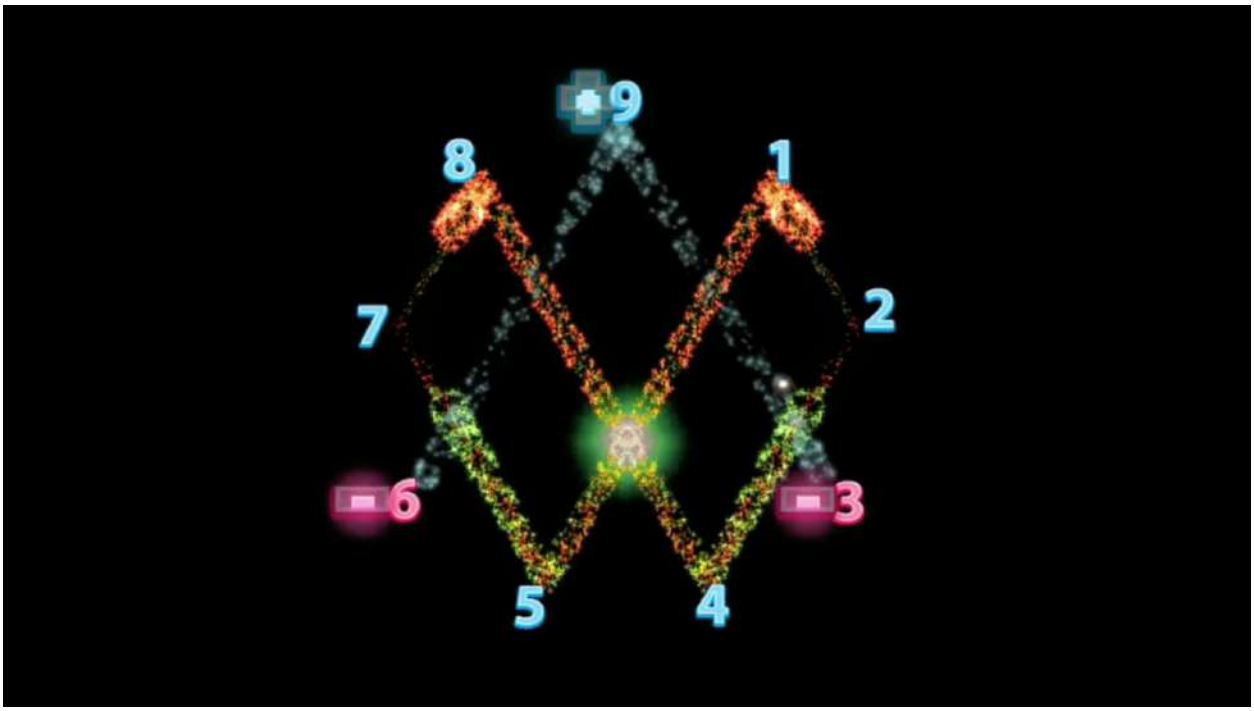
The other side is 8, 7 and 5, just like electricity, everything in the universe is a stream between these two polar sites.



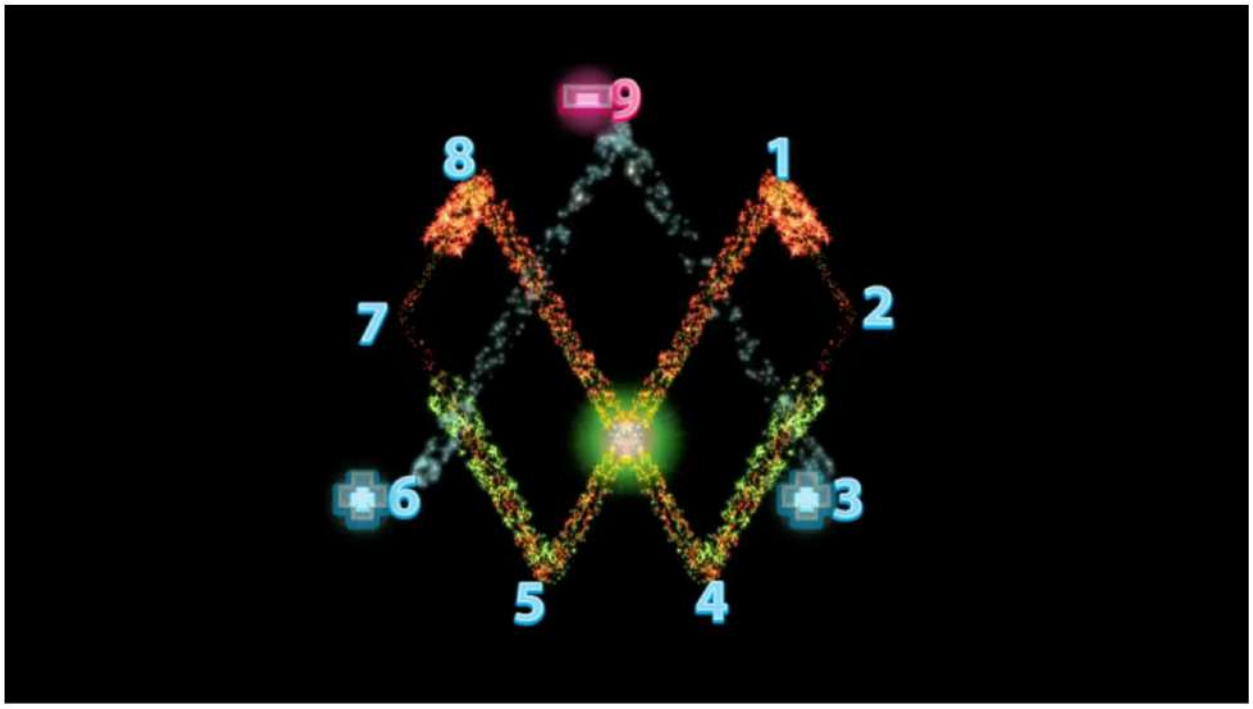
Like a swinging pendulum and if you could imagine the movement it's something like the symbol for infinity.



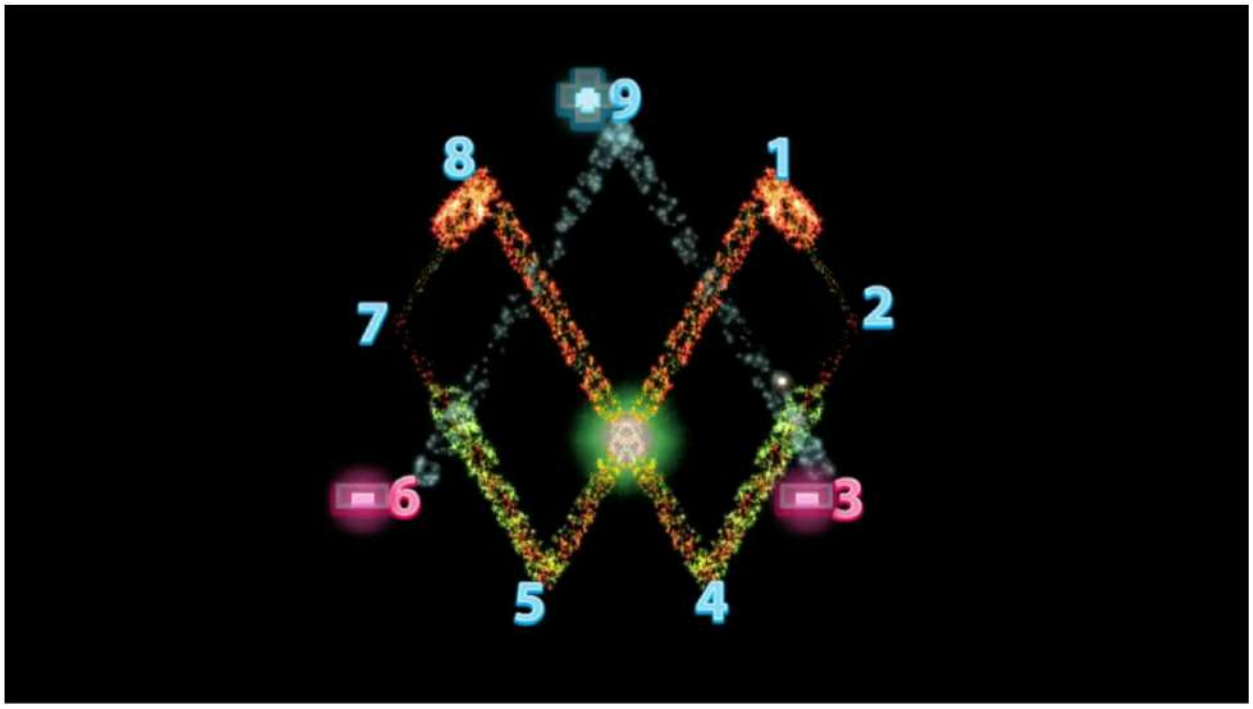
However, these suicides are governed by 3 and 6.



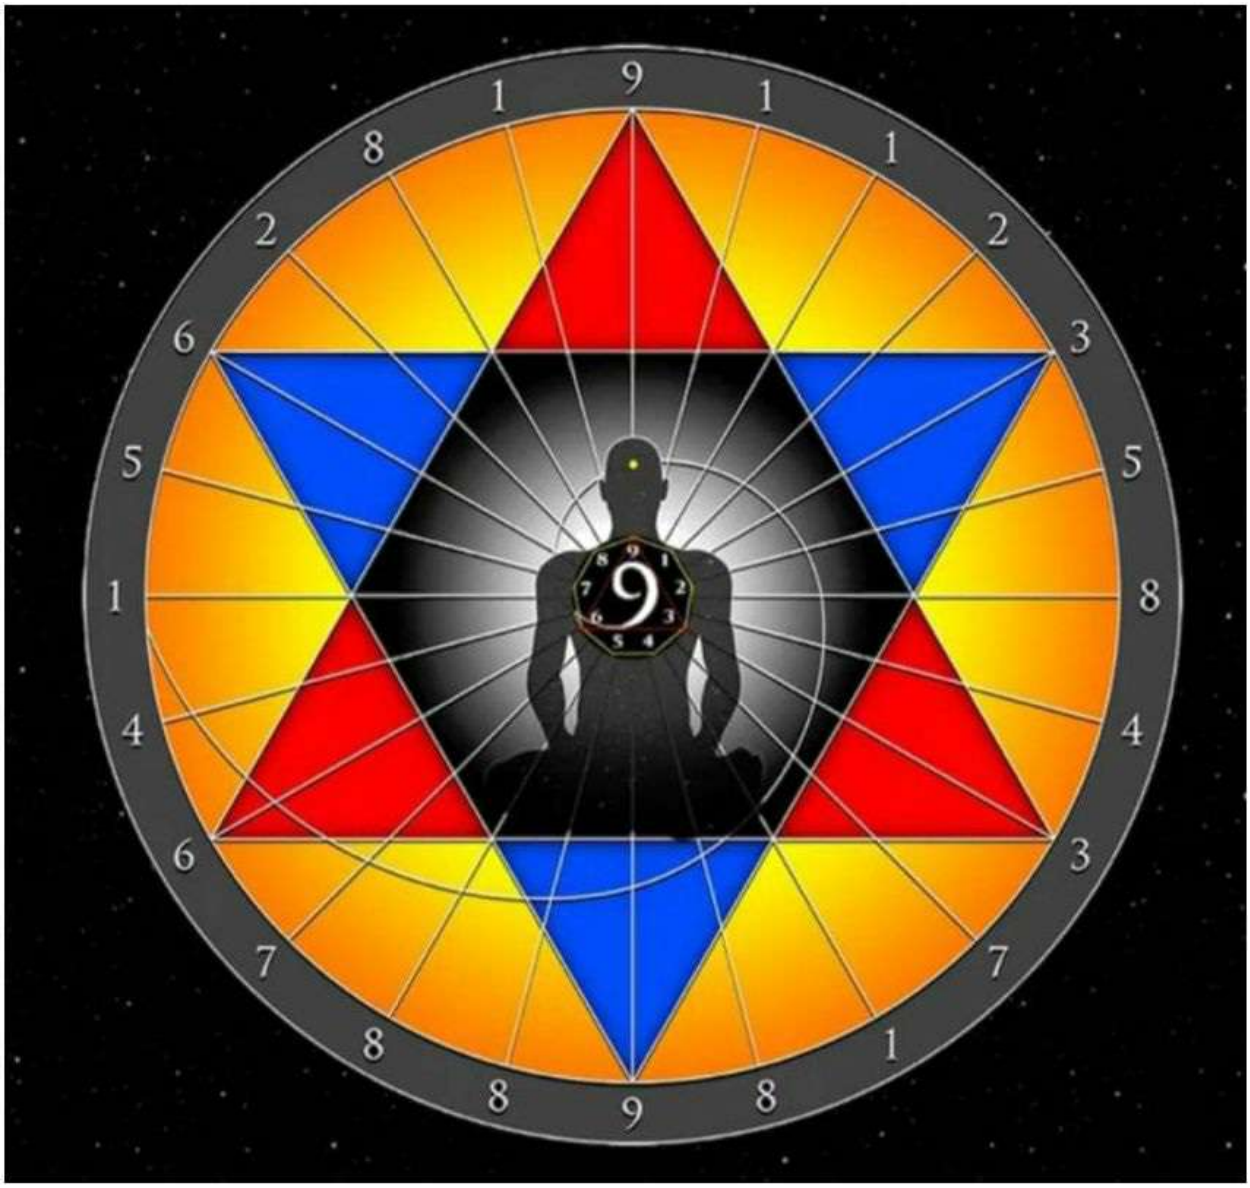
3 governs 1, 2 and 4.



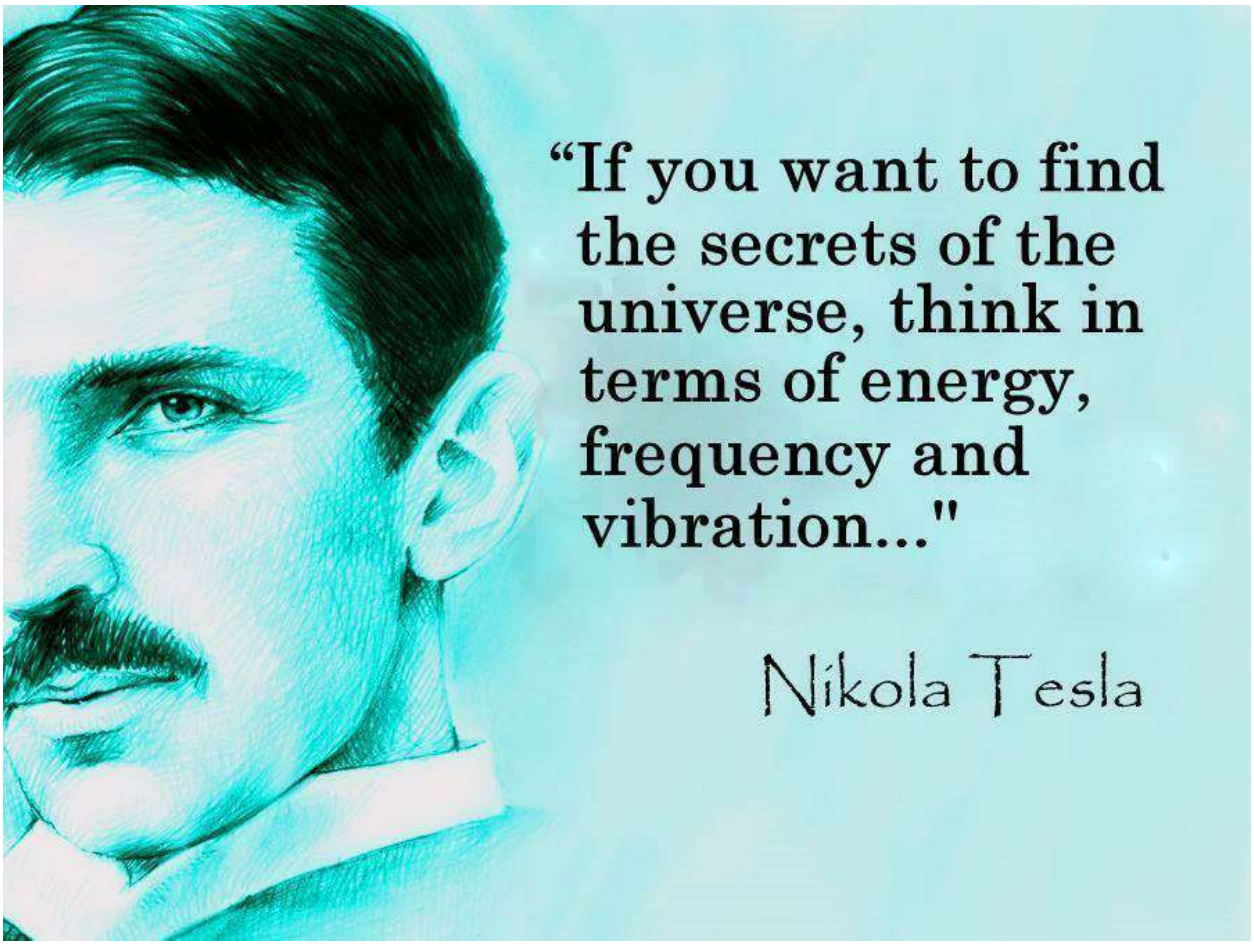
While 6 governs 8, 7 and 5.
And if you look at the pattern closely, it gets even more mindboggling...
1 and 2 equals 3, 2 and 4 equals 6, 4 and 8 equals 3, 8 and 7 equals 6, 7 and 5 equals 3, 5 and 1 equals 6 and 1 in 2 equals 3.



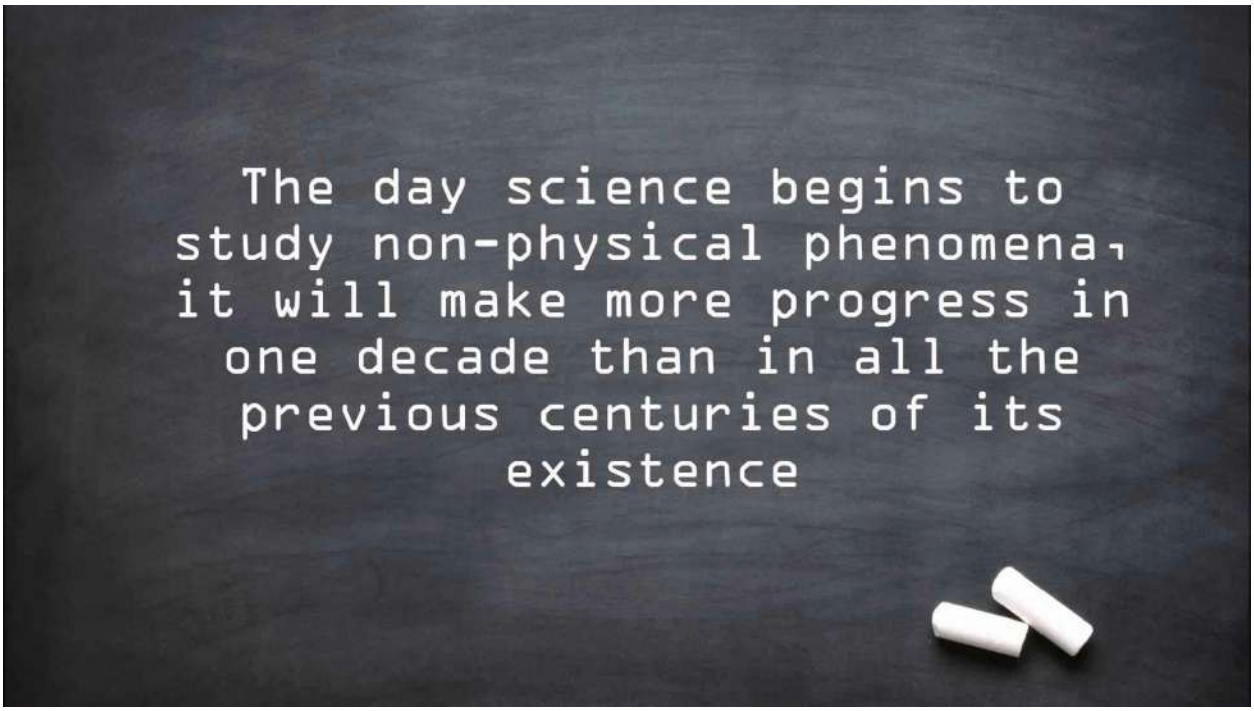
The same pattern on a higher scale is actually **3, 6, 3, 6, 3, 3.**
But even these **2, 3** and **6** are governed by **9** , which shows something spectacular.
Looking closely at the pattern of **3** and **6** you realize that **3 + 6** equals **9** and **6 + 3** equals **9.**
All the numbers together equal **9** both ways excluding and including **3 + 6.**
So ¨ **9** ¨ means the unity of the both sides, ¨ **9** ¨ is the universe itself, the vibration, the energy.



And the frequency **3, 6** and **9...**

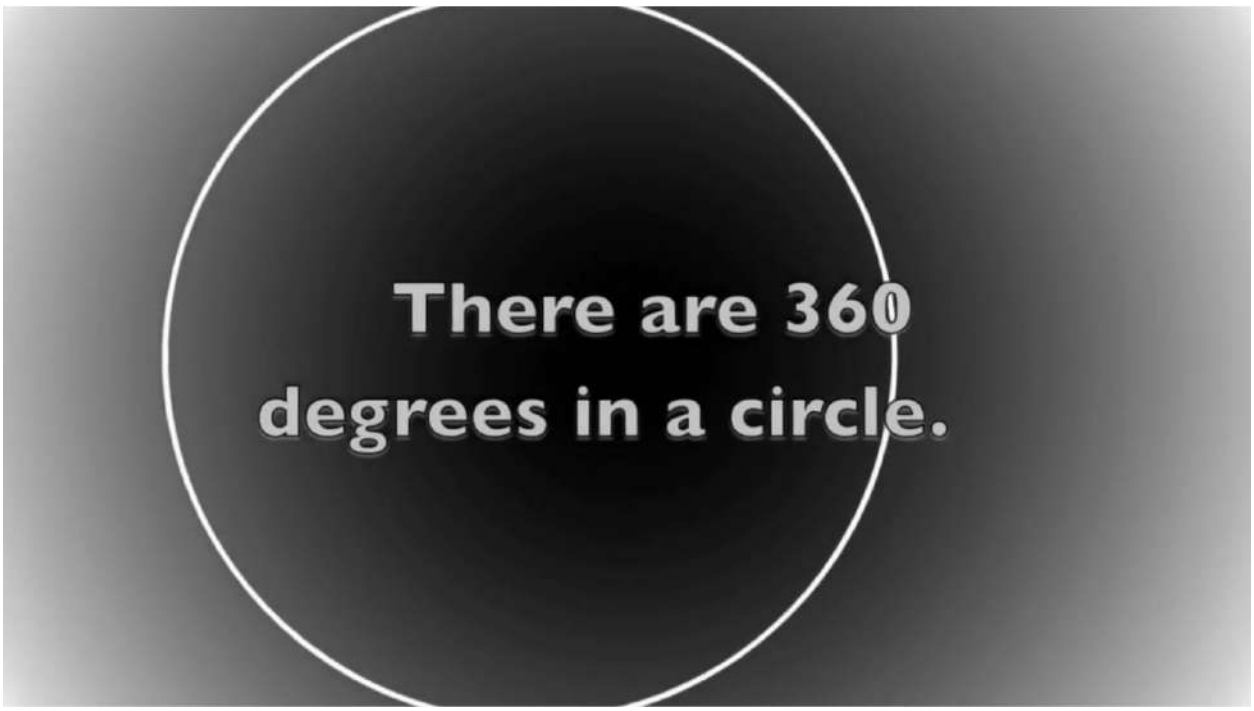


There is a deeper philosophical truth in this, let's imagine what we could accomplish if we could apply the sacred knowledge in everyday science.

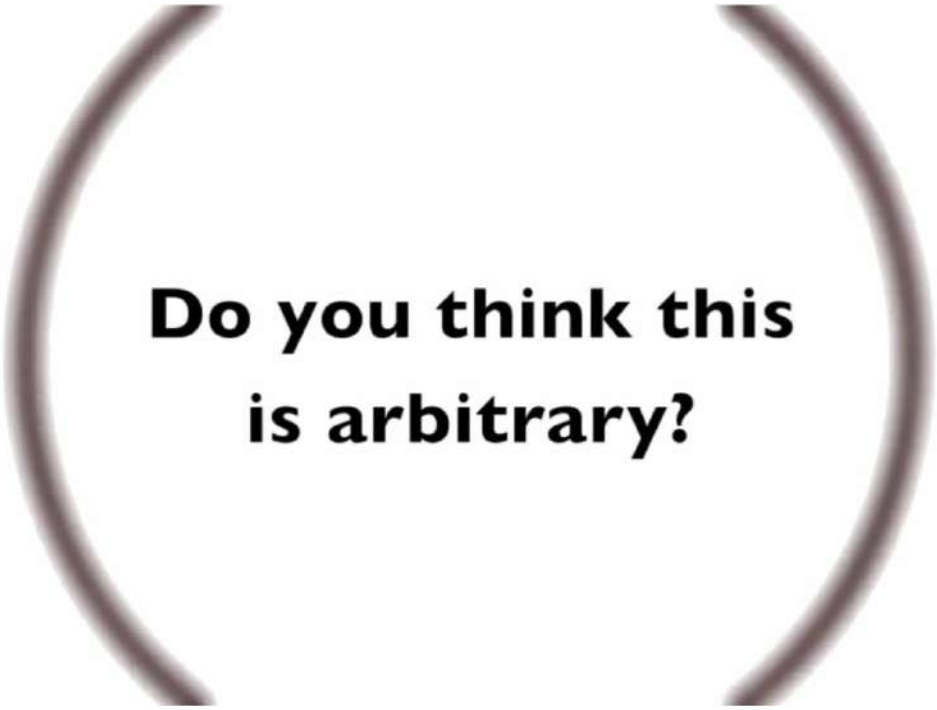


The day science begins to
study non-physical phenomena,
it will make more progress in
one decade than in all the
previous centuries of its
existence

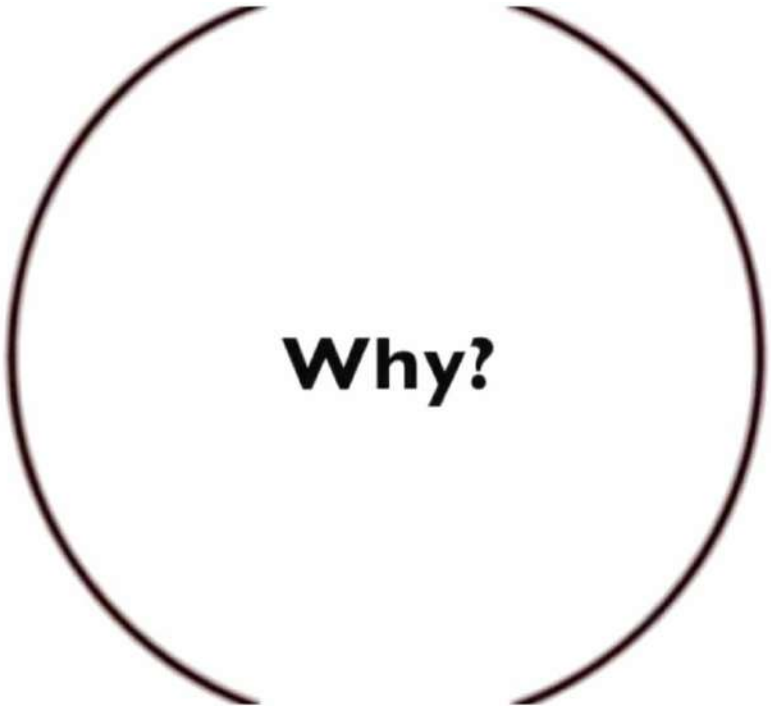
**Nikola Tesla;**



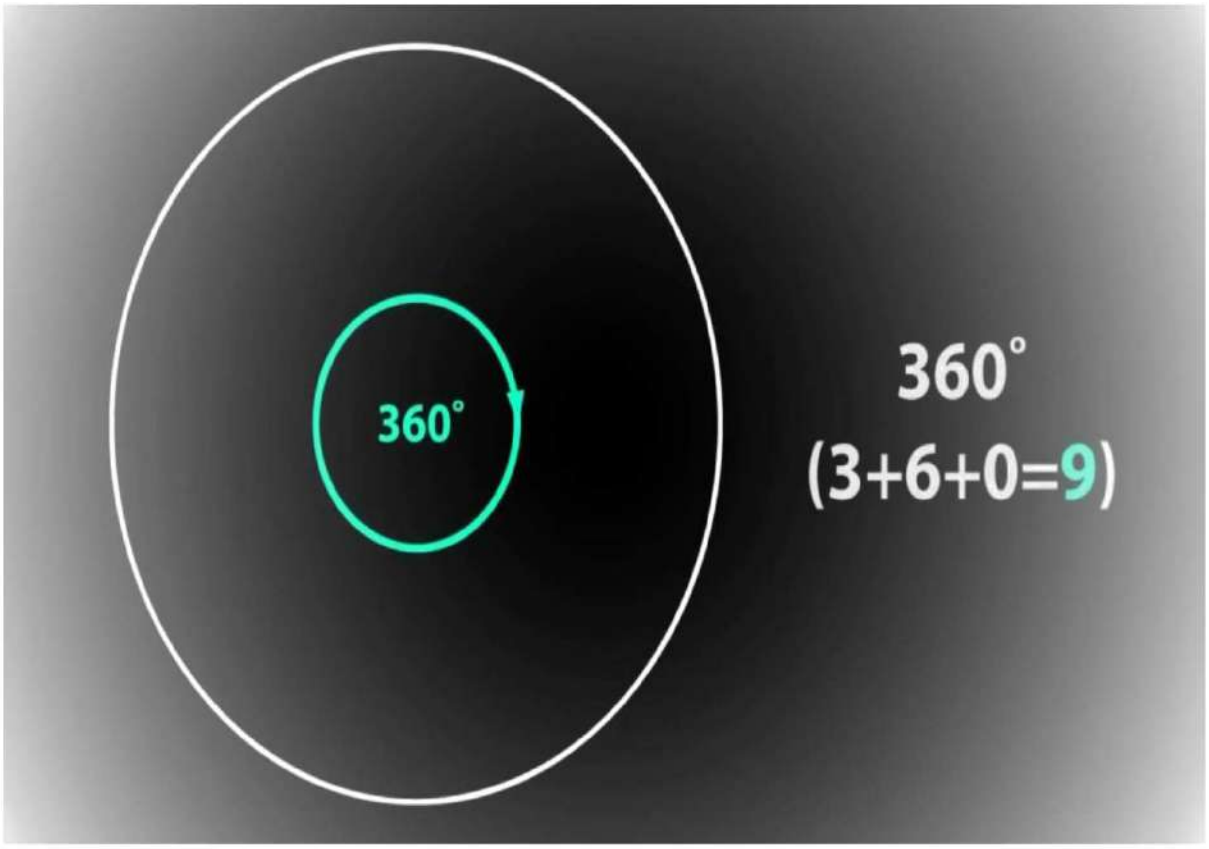
There are 360
degrees in a circle.



Do you think this
is arbitrary?



Why?



360°

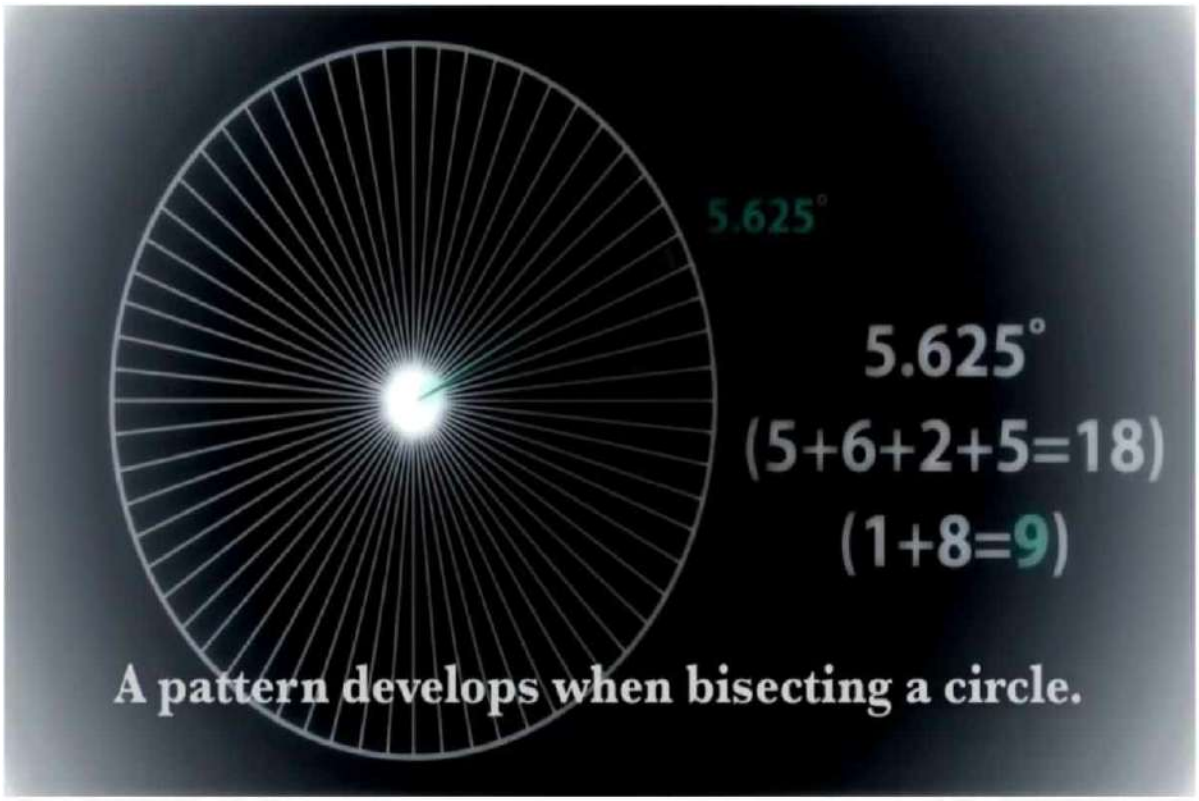
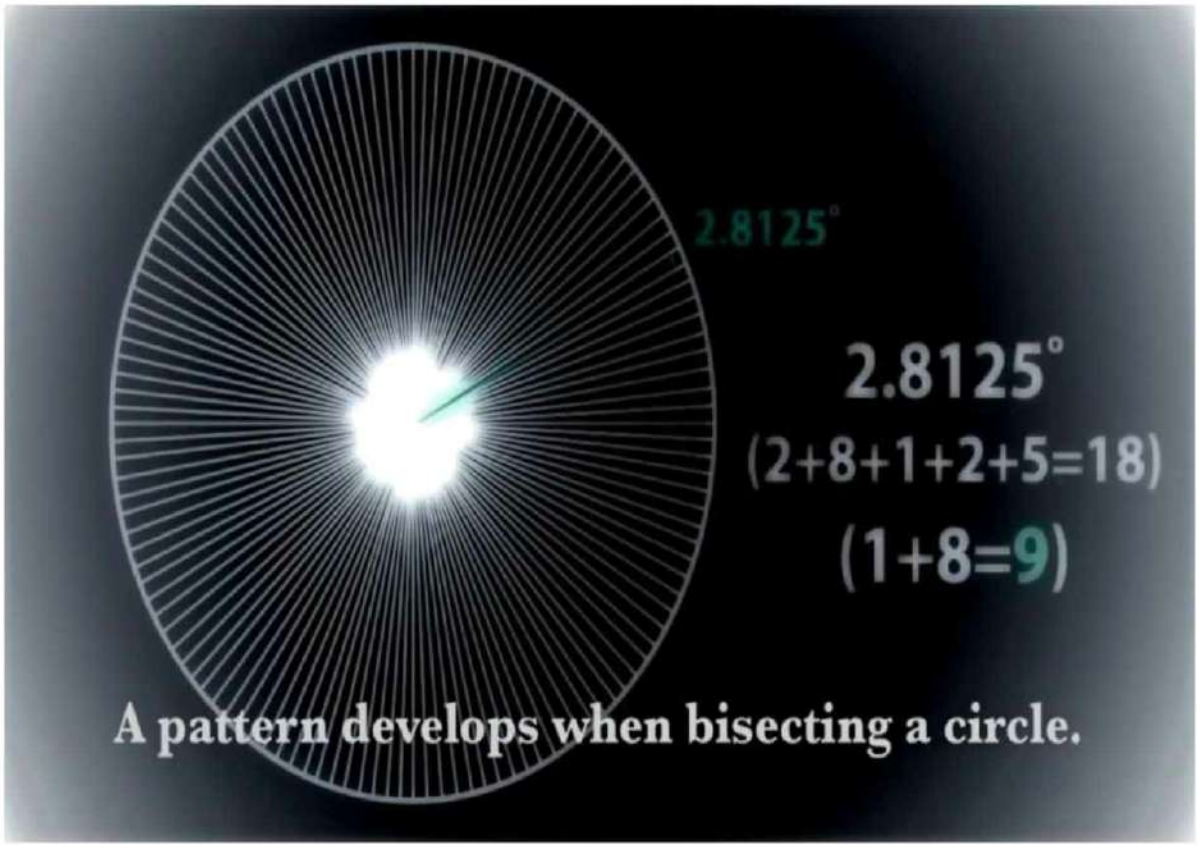
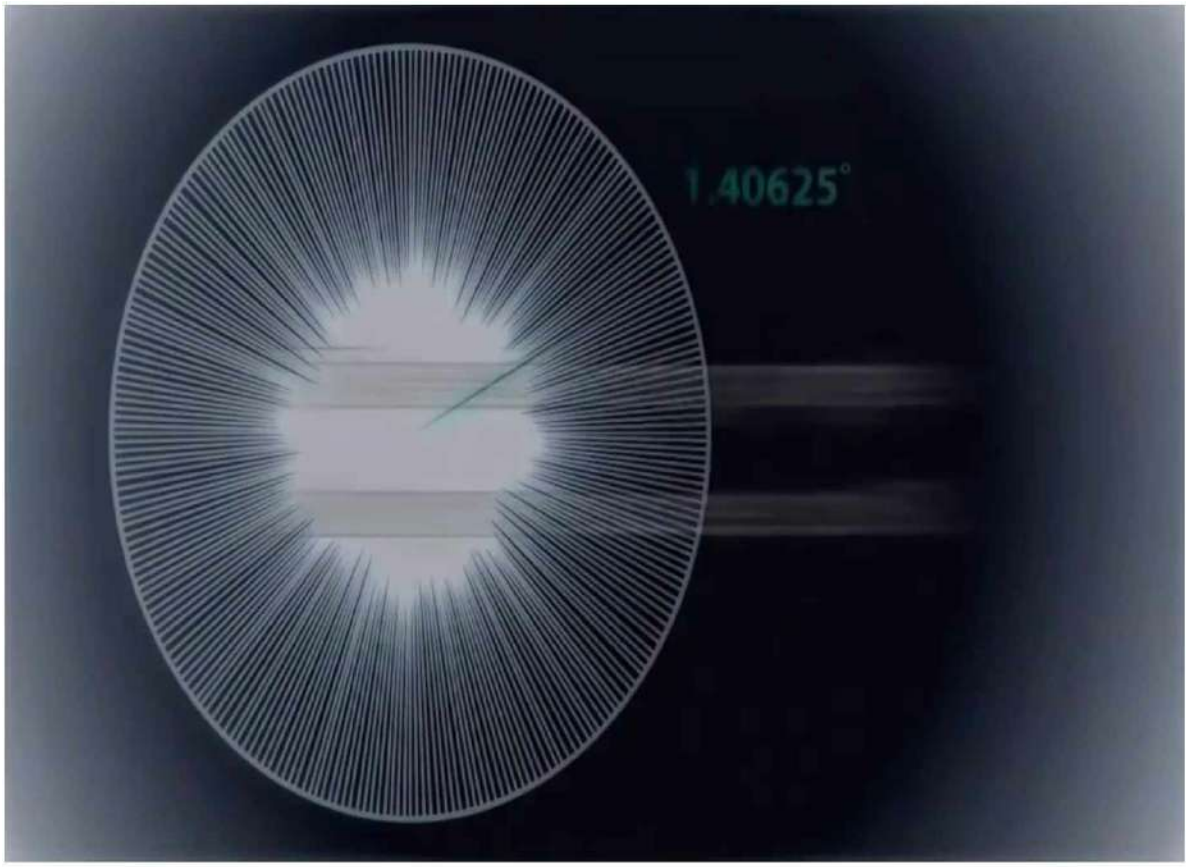
(1+1+2+5=9)



5.625°
5.625°
(5+6+2+5=18)
(1+8=9)
A pattern develops when bisecting a circle.

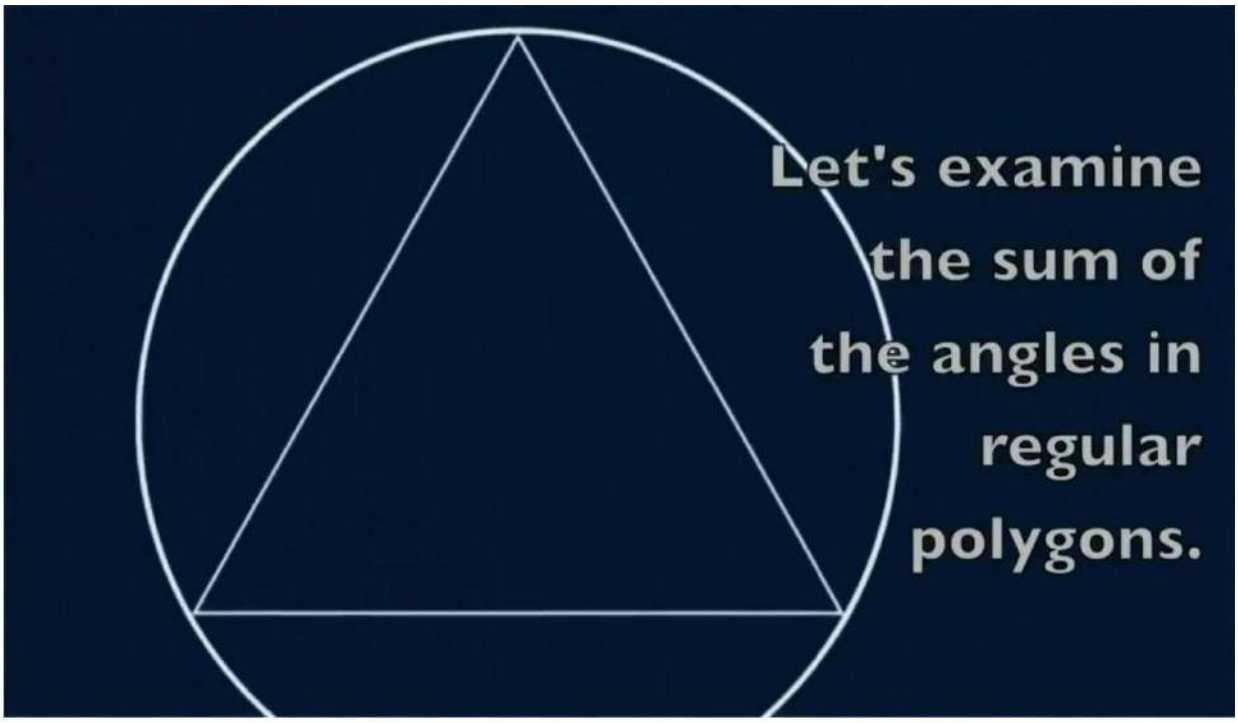


2.8125°
2.8125°
(2+8+1+2+5=18)
(1+8=9)
A pattern develops when bisecting a circle.



The resulting angle always reduces to 9.

**¿Is there a Divine code embedded in our numbers system?**
**Vortex Based Mathematics says, yes.**



Let's examine
the sum of
the angles in
regular
polygons.

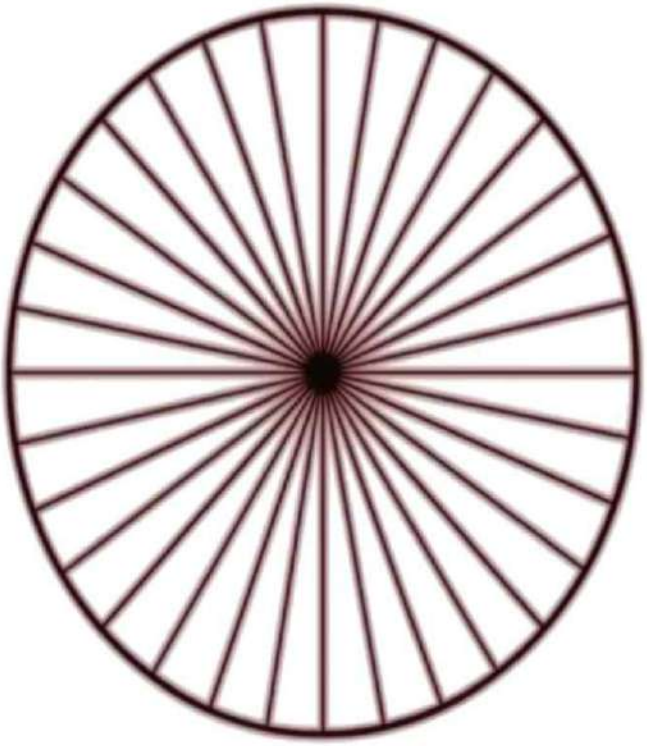
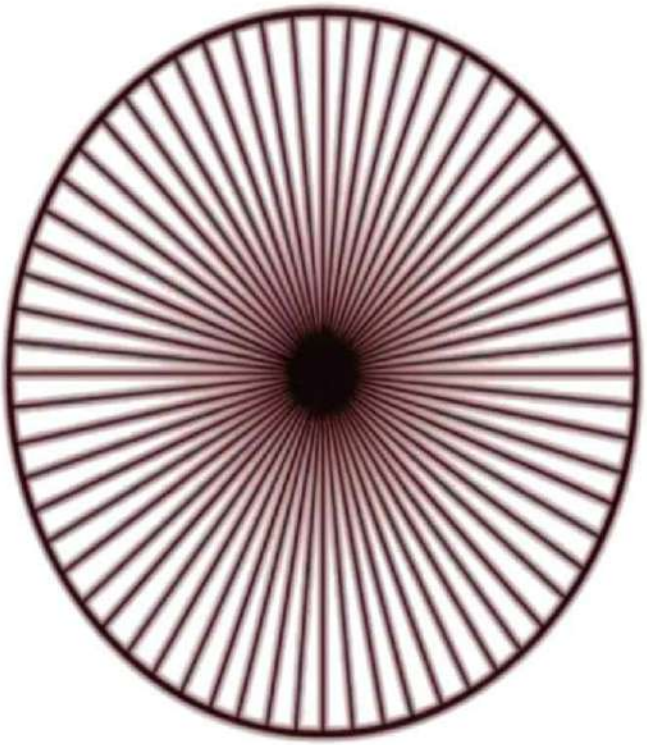
# ¿Meaningless Numerology? ¿Or divine symmetrology?

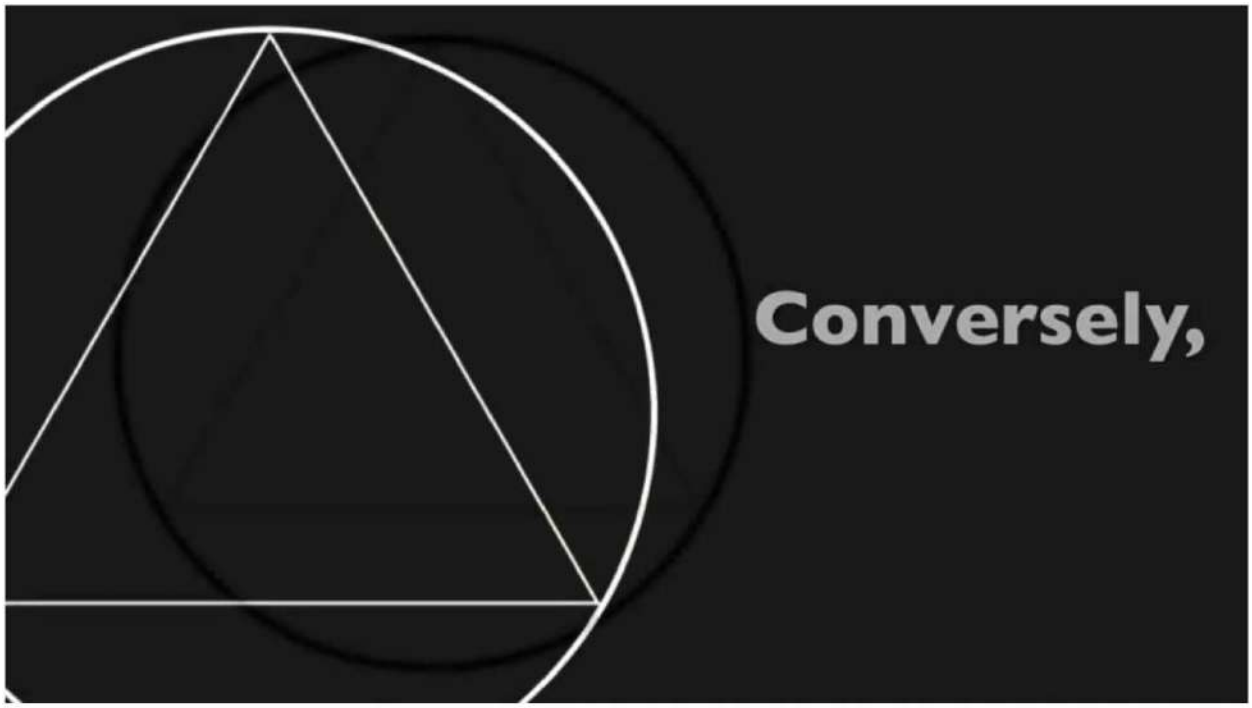
We observed
that when we
bisect a circle,

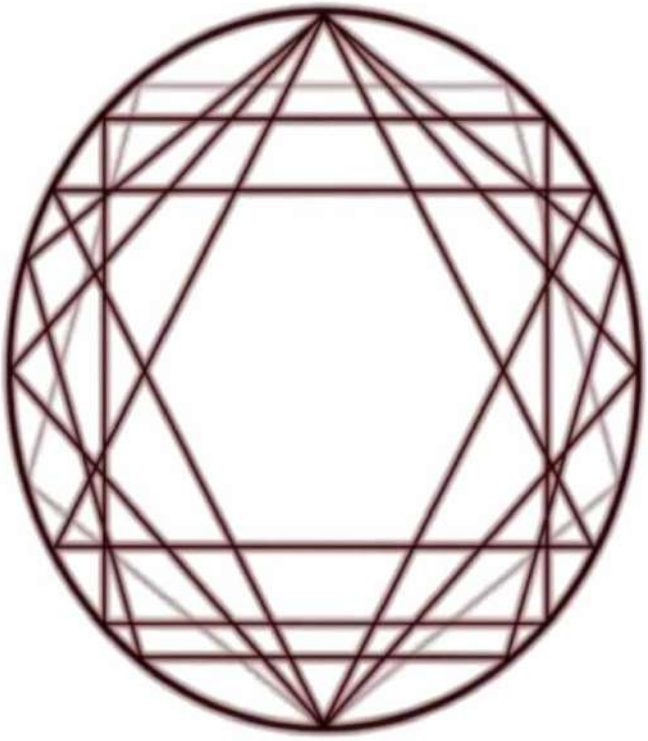


the
resulting
angle always
reduces to
nine.

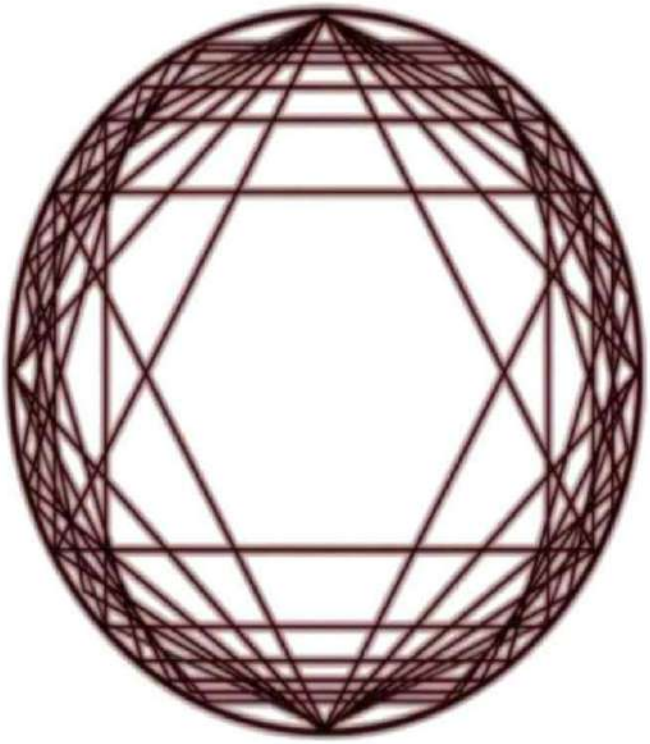


Converging
into a
singularity.

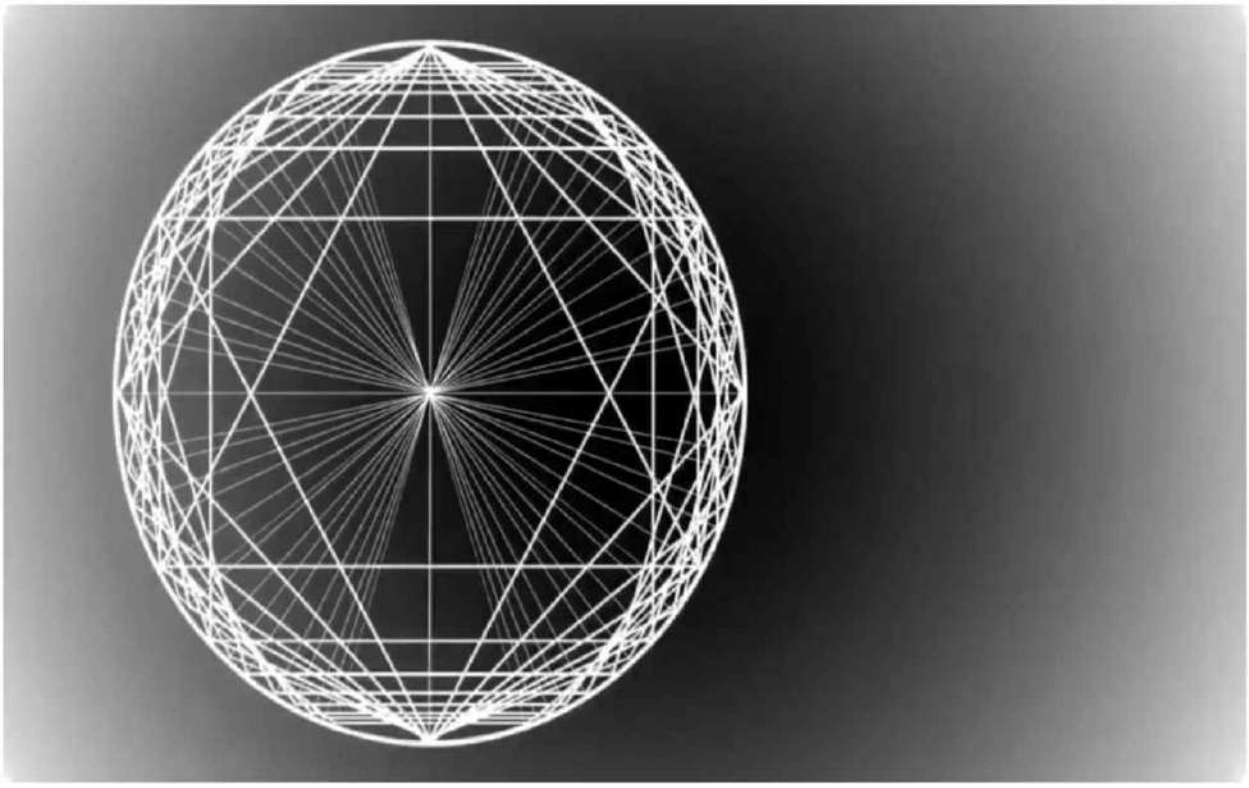


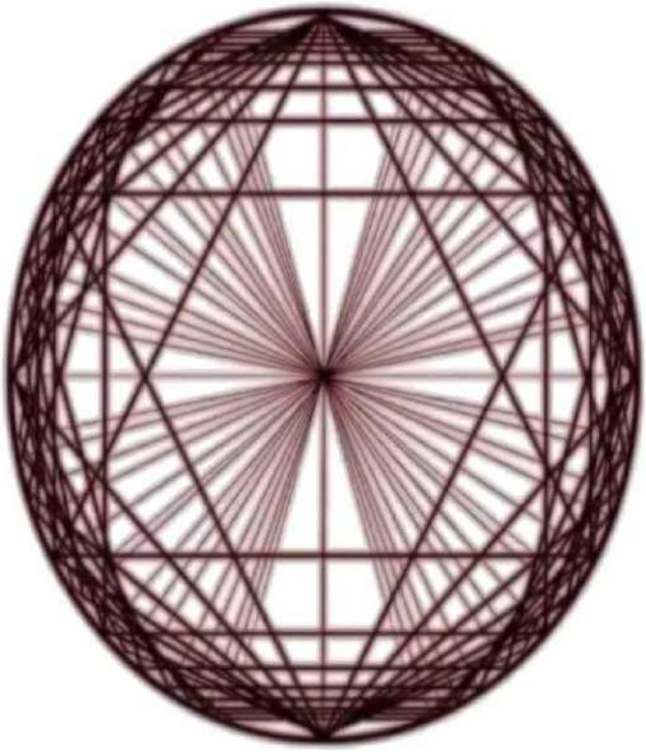


**Our polygons revealed the the exact opposite.**

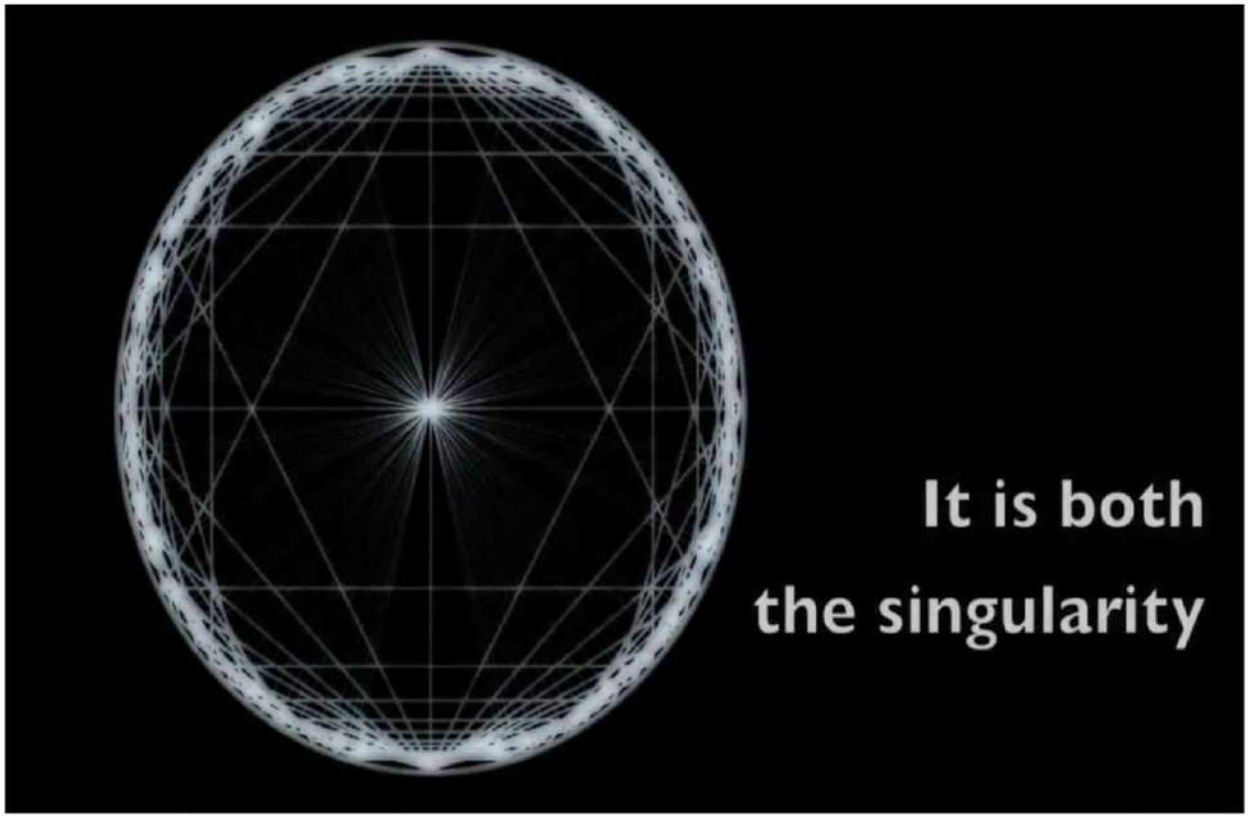


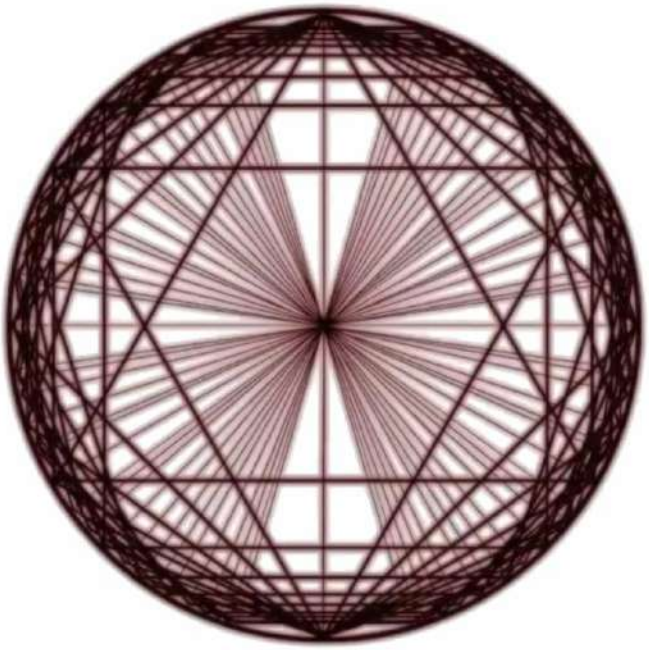
**Their vectors communicate an outward divergence.**





The nine
reveals
a linear
duality.





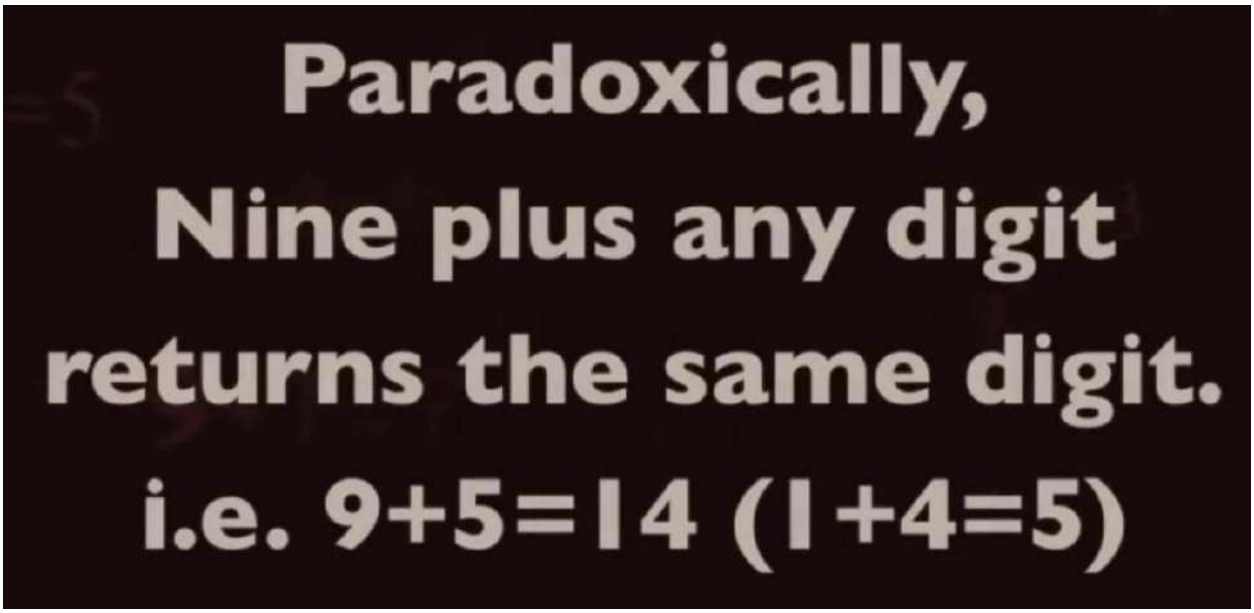
and the vacuum.

**Nine models ¨Everything¨ and ¨Nothing¨ simultaneously. ¿What do I mean by that?**

The sum of all digits excluding nine is 36.

1+2+3+4+5+6+7+8=36

(3+6=9)



So nine quite literally equals all the digits (36) and nothing (0).

So nine quite literally equals all the digits (36) and nothing (0).

**So, ¿Why was 6 Afraid of 7?**

# ¡Because 7, 8, 9!
